**Black Men in Britain** Kenny Monroe, 2019-09-20 While extensive attention has been paid to black youth adult black British men are a notable omission in academic literature This book is the first attempt to understand one of Britain s hidden populations the post Windrush generation who matured within a post industrial British society that rendered them both invisible and irrelevant Using ethnography participant observation interviews and his own personal experience and without an ounce of liberal angst Kenny Monroe pulls no punches and presents the reader with a fierce but sensitive study of a population that has been vilified and ignored The widely disseminated portrait of black maleness which habitually constructs black men as being either violently dangerous or social failures is challenged by granting black men in Britain the autonomy to speak on sociologically significant issues candidly and openly for themselves This reveals how this group has been forced to negotiate a glut of political shifts and socially imposed imperatives ranging from Windrush to Brexit and how these have had an impact on their life course This provides a cultural uplift and offers an authenticated examination and privileged insight of black British culture This book will be of interest to sociologists cultural historians and criminologists engaged with citizenship migration race racialisation and criminal justice

Beyond Racial Capitalism Caroline Shenaz Hossein, Sharon D. Wright Austin, Kevin Edmonds, 2023-02-28 Knowledge making in the field of alternative economies has limited the inclusion of Black and racialized people s experience In Beyond Racial Capitalism the goal is close that gap in development through a detailed analysis of cases in about a dozen countries where Black people live and turn to co operatives to manage systemic exclusion Most cases focus on how people use group methodology for social finance However financing is not the sole objective for many of the Black people who engage in collective business forms it is about the collective and the making of a Black social economy Systemic racism and anti Black exclusion create an environment where pooling resources in kind and money becomes a way to cope and to resist an oppressive system This book examines co operatives in the context of racial capitalism a concept of political scientist Cedric J Robinson s that has meaning for the African diaspora who must navigate often secretly and in groups the landmines in business and society Understanding business exclusion in the various cases enables appreciation of the civic contributions carried out by excluded racial minorities These social innovations by Black people living outside of Africa who build co operative economies go largely unnoticed If they are noted they are demoted to an informal activity and rationalized as having limited potential to bring about social change The sheer determination of Black diaspora people to organize and build co operatives that are explicitly

anti racist and rooted in mutual aid and the collective is an important lesson in making business ethical and inclusive

**Time and memory in reggae music** Sarah Daynes, 2013-07-19 On the basis of a body of reggae songs from the 1970s and late 1990s this book offers a sociological analysis of memory hope and redemption in reggae music From Dennis Brown to Sizzla the way in which reggae music constructs a musical religious and socio political memory in rupture with dominant models is vividly illustrated by the lyrics themselves How is the past remembered in the present How does remembering the past allow for imagining the future How does collective memory participate in the historical grounding of collective identity What is the relationship between tradition and revolution between the recollection of the past and the imagination of the future between passivity and action Ultimately this case study of memory at work opens up a theoretical problem the conceptualization of time and its relationship with memory
