about Jewish American literary history how they came into being and how they hardened into cliché. He offers a critical genealogy of breakthrough and other narratives through which Jewish Studies has asserted its compelling self-evidence not simply under the banner of the historical realities Jewish Studies claims to represent but more fundamentally for the intellectual and institutional structures through which it produces these representations. He shows how a historicist scholarly narrative quickly consolidated and became hegemonic in part because of its double articulation of a particular American subject and of a transnational historiography that categorically identified that subject as Jewish. The ethnological grounding of the Jewish American literary field is no longer tenable. Schreier asserts in an argument with broad implications for the reconceptualization of Jewish and other identity-based ethnic studies.
