**Defending Same-Sex Marriage** Martin Dupuis, William A. Thompson, Traci C. West, 2006-12-30 Today we find ourselves at a crossroads of two powerful unrelenting currents that are completely at odds with one another The movement for legal recognition of same sex unions has gone beyond the separate but equal status of civil unions to demand equality in marriage for all couples Progress is being made on many fronts mayoral action clergy officiating at same sex marriage and union ceremonies state legislative responses and street protests to name a few Meanwhile opposition to same sex marriage has also been gathering strength The struggle is sure to continue unabated for some time to come pitting those who believe in the traditional definition of marriage as a union between a man and a woman and who seek to codify this belief in the U S Constitution against those who find the basis for marriage between two loving committed individuals not only in the history of our civil rights legislation and court decisions but also in scripture and sacred religious traditions Those who believe in extending to same sex couples the 1 049 rights conferred by marriage as well as the supportive embrace of religious communities seek to strengthen the institution of marriage by making it inclusive and by passing laws and broadening doctrines to uphold marriage rights for all couples This three volume set clarifies the legal political religious cultural and social ramifications of same sex marriage for gay and lesbian couples and their families and friends and for the general public interested in the future of civil rights in the United States *Catalog of Copyright Entries, Fourth Series* Library of Congress. Imagination and Critique James R. L. Noland, 2010-03-03 This book is most easily described as philosophy of history however this description may be a little misleading Truly this is a work of applied philosophy that was originally conceived not in a philosophy seminar but in a school of public policy As a philosopher learning about the study of public policy formation I was frequently struck by what I perceived to be two very different sets of assumptions and methods at work I found these assumptions and methods to be mutually exclusive conceptually but they were often employed simultaneously On the one hand it was often accepted as given when studying past policy changes and political events that history is shaped by impersonal forces that people's actions can and ought only to be understood as manifestations of their own material interests and that individuals are to be identified as representatives of their respective demographic categories Thus for example the events in question were explained in terms of the race or class of the various parties When such an approach was challenged with an appeal to the actual arguments and stated rationales of the participants of the historical moment in question this was taken to be an option that might be employed either in conjunction with the former method or as an alternative Which method one chose to emphasize or employ exclusively seemed more a function of inclination or intuition than rational adjudication
