*Conditions of Visibility* Richard T. Neer, 2019 We often assume that works of visual art are meant to be seen Yet that assumption may be a modern prejudice The ancient world from China to Greece Rome to Mexico provides many examples of statues paintings and other images that were not intended to be visible Instead of being displayed they were hidden buried or otherwise obscured In this third volume in the Visual Conversations in Art it concerns ancient societies and modern disciplines and encompasses material circumstances perceptual capacities technologies of visualization protocols of classification and a great deal more The emerging field of archaeological art history is uniquely suited to address such questions Intrinsically comparative this approach cuts across traditional ethnic religious and chronological categories to confront the academic present with the historical past The goal is to produce a new art history that is at once cosmopolitan in method and global in scope and in doing so establish new ways of seeing new conditions of visibility for shared objects of study
