Conventional and Organic Farming: A Comprehensive Review through the Lens of Agricultural Science

Victor M. Shorrocks, 2017-12-18 Organic farming comes with many connotations of natural wholesome healthy superior environmentally friendly and sustainable But just what is the scientific evidence behind the claims of healthier food and better farming systems made by the organic movement Using peer reviewed literature the latest studies and a rigorous investigation of claims made by opponents of conventional farming the author provides an even handed and scientifically objective review of the contributions of organic farming to human health crop yields the environment and agriculture from a global perspective The aim is to separate out the marketing spin the claims of one camp or another and political ideologies to provide a straightforward appraisal of both the benefits and exaggerated claims of organic farming The approach taken is to present the evidence in the form of data study results and presentation of source material for the claims made by conventional and organic and leave the reader to make their own judgements on the validity of the case for organic over conventional farming The book also addresses a fundamental question in modern farming organic agriculture s ability to feed the world in the face of a growing population and growing demand for meat and provides a timely scientific comparison of the practices relative yields and benefits of organic versus conventional agriculture The ways conventional farming has progressed from hunter gatherer days and possible future developments are discussed Conventional and Organic Farming is an ideal book for agricultural policy makers researchers and academics as well as agricultural students conventional and organic farmers 5m Books

Source Separation and Decentralization for Wastewater Management Tove A. Larsen, Kai M. Udert, Judit Lienert, 2013-02-01 Is sewer based wastewater treatment really the optimal technical solution in urban water management This paradigm is increasingly being questioned Growing water scarcity and the insight that water will be an important limiting factor for the quality of urban life are main drivers for new approaches in wastewater management Source Separation and Decentralization for Wastewater Management sets up a comprehensive view of the resources involved in urban water management It explores the potential of source separation and decentralization to provide viable alternatives to sewer based urban water management During the 1990s several research groups started working on source separating technologies for wastewater treatment Source separation was not new but had only been propagated as a cheap and environmentally friendly technology for the poor The novelty was the discussion whether source separation could be a sustainable alternative to existing end of pipe systems even in urban areas and industrialized countries Since then sustainable resource management and many different source separating technologies have been investigated The theoretical framework and also possible technologies have now developed to a more mature state At the same time many interesting technologies to process combined or concentrated wastewaters have evolved which are equally suited for the treatment of source separated domestic wastewater The book presents a comprehensive view of the

state of the art of source separation and decentralization It discusses the technical possibilities and practical experience with source separation in different countries around the world The area is in rapid development but many of the fundamental insights presented in this book will stay valid Source Separation and Decentralization for Wastewater Management is intended for all professionals and researchers interested in wastewater management whether or not they are familiar with source separation Editors Tove A Larsen Kai M Udert and Judit Lienert Eawag Swiss Federal Institute of Aquatic Science and Technology Switzerland Contributors Yuval Alfiya Technion Israel Institute of Technology Faculty of Civil and Environmental Engineering Prof Dr M Bruce Beck University of Georgia Warnell School of Forestry and Natural Resources Dr Christian Binz Eawag Swiss Federal Institute of Aquatic Science and Technology Innovation Research in Utility Sectors Cirus Prof em Dr Markus Boller Eawag Swiss Federal Institute of Aquatic Science and Technology Department of Urban Water Management SWW Prof Dr Eran Friedler Technion Israel Institute of Technology Faculty of Civil and Environmental Engineering Zenah Bradford Hartke The University of New South Wales School of Chemical Engineering and UNESCO Centre for Membrane Science and Technology Dr Shelley Brown Malvern Very Small Particle Company Ltd Bert Bundervoet Ghent University Laboratory Microbial Ecology and Technology LabMET Prof Dr David Butler University of Exeter Centre for Water Systems Dr Christopher A Buzie Hamburg University of Technology Institute of Wastewater Management and Water Protection Dr Dana Cordell University of Technology Sydney UTS Institute for Sustainable Futures ISF Dr Vasileios Diamantis Democritus University of Thrace Department of Environmental Engineering Prof Dr Jan Willem Erisman Louis Bolk Institute VU University Amsterdam Department of Earth Sciences Barbara Evans University of Leeds School of Civil Engineering Prof Dr Malin Falkenmark Stockholm International Water Institute Dr Ted Gardner Central Queensland University Institute for Resource Industries and Sustainability Dr Heiko Gebauer Eawag Swiss Federal Institute of Aquatic Science and Technology Innovation Research in Utility Sectors Cirus Prof em Dr Willi Gujer Swiss Federal Institute of Technology Zurich ETHZ Department of Civil Environmental and Geomatic Engineering BAUG Prof Dr Bruce Jefferson Cranfield University Cranfield Water Science Institute Prof Dr Paul Jeffrey Cranfield University Cranfield Water Science Institute Sarina Jenni Eawag Swiss Federal Institute of Aquatic Science and Technology Process Engineering Department Eng Prof Dr H kan J nsson SLU Swedish University of Agricultural Sciences Department of Energy and Technology Prof Dr sik Kabdasli Istanbul Technical University Civil Engineering Faculty Prof Dr J rg Keller The University of Queensland Advanced Water Management Centre AWMC Prof Dr Klaus K mmerer Leuphana Universit t L neburg Institute of Sustainable and Environmental Chemistry Dr Katarzyna Kujawa Roelleveld Wageningen University Agrotechnology and Food Sciences Group Dr Tove A Larsen Eawag Swiss Federal Institute of Aquatic Science and Technology Department of Urban Water Management SWW Michele Laurenzi Eawag Swiss Federal Institute of Aquatic Science and Technology Process Engineering Department Eng Prof Dr Gregory Leslie The University of New South Wales School of Chemical Engineering and UNESCO Centre for Membrane Science and
