Mandujano,Irene Pisanty,Luis E. Eguiarte,2022-01-03 This book takes readers on a journey through the history of water in the Coahuila desert It starts by describing the beauty and mysteries of the landscape and then explores the rock art of the original desert cultures in Coahuila offering readers a glimpse of the sacred nature of water in the desert as well as the rituals surrounding it Moving on to the colonial times and the post independence development of the region it discusses early water management and explores how water is managed

in modern times as well as the legal complications of the law and how these faulty laws designed for less arid regions have affected a highly diverse wetland the Cuatro Ci negas oasis The book then examines the biological consequences of the water loss for the aquatic plants and animals in Churince a now extinct system within Cuatro Ci negas Further it addresses how even bacteria can become extinct in this hyper diverse microbial oasis Lastly after this despair and sense of loss the book provides hope offering suggestions for how we can transform the future from a social and educational point of view as well as through good science and changes in policy
