Psychology, Rationality and Economic Behaviour B. Agarwal, A. Vercelli, 2005-08-03 Economics has paid little attention to the psychology of economic behaviour leading to somewhat simplistic assumptions about human nature The psychological aspects have typically been reduced to standard utility theory based on a narrow conception of rationality and self interest maximization The contributions in this volume some focused on analytical models and methodology others on laboratory and field experiments challenge these assumptions and provide

novel and complex understandings of human motivation and economic decision making With a pioneering introduction by the book's two editors this volume brings together exciting contributions to a field that is rapidly growing in influence and reach

Billari, Thomas Fent, Alexia Prskawetz, Jürgen Scheffran, 2006-06-14 The present book describes the methodology to set up agent based models and to study emerging patterns in complex adaptive systems resulting from multi agent interaction. It offers the application of agent based models in demography, social and economic sciences and environmental sciences. Surveys in Experimental Economics Friedel Bolle, Marco Lehmann-Waffenschmidt, The Organization of Firms in a Global Economy Elhanan Helpman, Dalia Marin, Thierry Verdier, 2008-11-30 The Organization of Firms in a Global Economy presents a new research program that is transforming the study of international trade. Driven by the availability of new micro data sets and innovative theoretical models, it focuses on the level of firms, products and stages of production rather than on countries and industries. It addresses such questions as why only a small proportion of firms in a given industry export and why an even smaller proportion invest abroad, why exporters tend to be more productive than nonexporters, why almost one third of international trade takes place between units of the same firm and why as much as two thirds involves multinational firms as exporter, importer or both, and why international trade may have been the most important driver of organizational changes in the corporation that have been taking place in the last decade. Until a few years ago, models of international trade did not recognize the heterogeneity of firms and exporters and could not provide good explanations of international production networks. Now such models exist and are explored in this volume.
