Innovations in European Rural Landscapes Hubert Wiggering, Hans-Peter Ende, Andrea Knierim, Marina Pintar, 2010-01-08 Rural regions in Europe are evolving under powerful boundary conditions such as globalisation socio cultural transformations and climate change which in turn increases natural hazards The regional land use and the evolvement of landscapes is increasingly shaped trends and drivers like infrastructural

energy or housing needs globalised agricultural markets and consumption habits To face these challenges and to balance competitiveness with social cohesion the InnoLand research and development network induces and accompanies promising land use innovations at the landscape scale in 10 European rural regions Based on a common conceptual approach among the InnoLand partners the development and implementation of new competitive strategies is conducted as a science practice dialogue with strong commitment to the regional policy design for rural development With this book the network partners provide an overview and a comparative analysis of selected experimental regional approaches and give examples for the successful tackling of future opportunities and threats

The New Dimensions of the European Landscapes R.H.G Jongman, 2005-05-09 The European Landscape is under stress of changing land use and a changing attitude of its users Globalization the disappearance of the iron curtain and the recent EU enlargement to 25 countries have changed the economic and environmental dimensions of Europe Europe is changing its face from a western and eastern part to one European Union and to fast connections between its centres of activity The rural and cultural heritage of Europe has to be adapted to cope with this change However its landscape is worth to be conserved as well because it represents the European history in the same way as castles and churches It even more represents the history of the common people because it has been the tradition of the rural population that made these landscapes It cannot be prevented that Europe is changing and it is good that Europe adapts to the new dimensions of the world We in Europe have to define what we think is important and what must be conserved what can be adapted to be used for new functions and what can be abolished because it has no value These decisions will determine the new dimensions of the European landscapes The Frontis Workshop on the New Dimensions of the European Landscape was held on 10-12 June 2002 Wageningen University and Research Centre organized this workshop aiming to develop visions on the landscape in Europe its development and design in the future and to strengthen the international network in landscape planning

Trees in a Sub-Saharan Multi-functional Landscape Paxie W. Chirwa, Stephen Syampungani, Theodore M. Mwamba, 2024-10-01 Africa is largely dependent on natural resources in its quest to achieve sustainable development goals with its woodlands and forests known to be among the most exploited ecosystems Anthropogenic pressure has led to the progressive conversion of these woodlands and forests into patches of regrowth stands savanna and cropland systems Expansion with intensification of agricultural land and the unsustainable use of fuelwood biomass are among the major drivers of such landscape transformations and the associated decline of biodiversity and ecosystem services This phenomenon is growing in magnitude and significance with emerging environmental issues including climate change biological invasion and pollution arising from various land use practices thereby jeopardizing Africa's development pathway Agroforestry holds promises to reverse this trend as it provides the potential for designing multifunctional agricultural landscapes that guarantee trade offs of food security biodiversity conservation and ecosystem services Africa is characterized by highly variable ecological conditions and remarkable cultural diversity that influence the

conception of landscape multifunctionality Drawing upon the vast experience of researchers and many other professionals in Africa this book contextualizes the roles of trees in African multifunctional landscapes capturing the biophysical and societal diversity in the region while scrutinizing the ongoing trend of landscape multifunctionality in Africa with reference to the global scenario It is designed to provide a holistic and comprehensive understanding of the various roles of trees in African landscapes and shed light on the underlying functional attributes of trees which will help readers to generate a better insight and problem solving approach for landscape multifunctionality in the context of Africa This book defines the multifunctional landscapes with reference to an African context The book has fourteen chapters covering five broad thematic areas i the multiple services functions and role of trees in multifunctional landscapes ii tree based production systems products and their contributions to rural livelihoods iii drivers of land cover changes and their impacts iv approaches for managing resources to integrate trees in multifunctional landscapes and v external factors affecting landscape resources management in Africa

Rural Landscapes and Agricultural Policies in Europe Annette Piore, Klaus Müller, 2009-10-29 These are the final results and reflections of the project MEA Scope This project with the full title Micro economic instruments for impact assessment of multifunctional agriculture to implement the model of European Agriculture was a pioneering project It was among the first which were funded in the new activity Scientific Support to Policies of the 6th Research Framework Programme Policy decisions especially at the European level are never easy What policy makers decide will potentially affect the lives of millions of people for many years This makes reaching informed decisions crucial and scientific research can help illuminate their policy choices MEA Scope was one of two projects which addressed the research priorities for European Rural areas which were identified in an EC workshop on Multifunctionality in Agriculture in 2001 Scientific Support to Policies in the Research Framework Programme is facing the challenge to identify in the discussions between policy makers and the research community those topics which can be addressed in a medium term strategic research programme When the research topic was published Multifunctionality of Agriculture was among the concepts with many search questions open It was considered that positivistic approaches into technology aspects of agriculture forestry and other rural activities based on natural resources and land use are needed as well as more normative research with regard to trade food quality and safety animal welfare environment rural development and cultural issues
