Swedish Development Aid In Perspective Policies Problems And Results Since 195:

Swedish Development Aid in Perspective Pierre Fröhling, 1986 **Aid Power and Politics** Iliana Olivié, Aitor Pérez, 2019-07-25 Aid Power and Politics delves into the political roots of aid policy demonstrating how and why governments across the world use aid for global influence and exploring the role it plays in present day global governance and international relations In reconsidering aid as part of international relations the book argues that the interplay between domestic and international development policy works in both directions with individual countries having the capacity to shape global issues whilst at the same time global agreements and trends in turn shape the political behaviour of individual countries Starting with the background of aid policy and international relations the book goes on to explore the behaviour of both traditional and emerging donors the US the UK the Nordic countries Japan Spain Hungary Brazil and the European Union and then finally looks at some big international agendas which have influenced donors from the liberal consensus on democracy and good governance to gender equality and global health Aid Power and Politics will be an important read for international development students researchers practitioners and policy makers and for anyone who has ever wondered why it is that countries spend so much money on the well being of non citizens outside their borders **Giving Well** Patricia Illingworth, Thomas Pogge, Leif Wenar, 2011-01-14 In Giving Well The Ethics of Philanthropy an accomplished trio of editors bring together an international group of distinguished philosophers social scientists lawyers and practitioners to identify and address the most urgent moral questions arising today in the practice of philanthropy **Agrindex**, 1995 **Development Dialogue**, 1987 *International Books in Print*, 1995 Barbara Hopkinson, [Anonymus AC01401231], 1995 **The Samaritan's Dilemma** Clark C. Gibson, Krister Andersson, The late Elinor Ostrom, Sujai Shivakumar, 2005-09-08 What's wrong with foreign aid Many policymakers aid practitioners and scholars have called into question its ability to increase economic growth alleviate poverty or promote social development At the macro level only tenuous links between development aid and improved living conditions have been found At the micro level only a few programs outlast donor support and even fewer appear to achieve lasting improvements The authors of this book argue that much of aid's failure is related to the institutions that structure its delivery These institutions govern the complex relationships between the main actors in the aid delivery system and often generate a series of perverse incentives that promote inefficient and unsustainable outcomes In their analysis the authors apply the theoretical insights of the new institutional economics to several settings First they investigate the institutions of Sida the Swedish aid agency to analyze how that aid agency's institutions can produce incentives inimical to desired outcomes contrary to the desires of its own staff Second the authors use cases from India a country with low aid dependence and Zambia a country with high aid dependence to explore how institutions on the ground in recipient countries also mediate the effectiveness of aid Throughout the book the authors offer suggestions about how to improve aid's effectiveness These suggestions include how to structure evaluations in order to

improve outcomes how to employ agency staff to gain from their on the ground experience and how to engage stakeholders as owners in the design resource mobilization learning and evaluation processes of development assistance programs
