Sediment Removal Robert Brinkmann, Graham A. Tobin, 2012-12-06 There is not an extensive literature on street sweeping Much of the research that has been completed exists in the gray area of technical reports and government documents Furthermore a great deal of this research is locally based and has not been widely published Indeed our review of the scientific literature revealed that while storm water quality has received a lot of attention few academicians have been involved in street sweeping research per se Thus throughout our research into street we sweeper effectiveness sweeping protocols and sweeping practices wished that there had been a book summarizing some of the important issues associated with street sweeping As our frustration grew we realized that we were uniquely poised to write such a book as our research had encompassed a variety of different projects including sweeper testing waste management and related storm water quality Also early on in this exercise we recognized that there was a growing demand for information about street sweeping policies and management especially for studies focusing on the effectiveness of different sweeping schedules on waste management operations and on non point pollution reduction practices associated with storm water runoff It was abundantly clear that there was a profound lack of research on street sweeping that could assist with developing local regional or national policies There was in effect little guidance for city managers on these issues Water-resources Investigations Report, 2002 Water-resources Investigations Report Donald A.
