Taking State Power The Sources And Consequences Of Political Challenge:

Taking state power John C. Leggett,1973 **Humour and Social Protest** Marjolein 't Hart,Dennis Bos,2007 The seventeen essays in this book examine the power of humour in framing social and political protest *History and the Christian Historian* Ronald Wells,1998-09-17 This volume arises out of special concerns of historians who are also Christians What case can be made for connecting historical work and religious convictions What is the relation of faith to history What difference could Christian perspectives make in historical study Thirteen respected scholars including some who have changed the face of history writing in the twentieth century here take up a diversity of subjects in giving a provisional answer to these important questions In exploring foundational issues of perspective and theory engaging discrete themes such as feminism puritanism and missiology and discussing the application of religious insights in teaching history this excellent collection of essays forthrightly addresses the epistemological crisis brought on by the postmodern critique of truth and demonstrates the positive implications of a Christian perspective for the study of history and historiography Unchecked Corporate Power Gregg Barak,2017-02-03 Why are crimes of the suite punished more leniently than crimes of the street When police killings of citizens go unpunished political torture is sanctioned by the state and the financial frauds of Wall Street traders remain unprosecuted nothing succeeds with such regularity as the active failures of national states to obstruct the crimes of the powerful Written from the perspective of global sustainability and as an unflinching and unforgiving expos of the full range of the crimes of the powerful Unchecked Corporate Power reveals how legalized authorities and political institutions charged with the duty of protecting citizens from law breaking and injurious activities have increasingly become enablers and colluders with the very enterprises they are obliged to regulate Here Gregg Barak explains why the United States and other countries are duplicitous in their harsh reactions to street crimes in comparison to the significantly more harmful and far reaching crimes of the powerful and why the crimes of the powerful are treated as beyond incrimination What happens to nations that surrender ever growing economic and political power to the globally super rich and the mammoth multinational corporations they control And what can people from around the world do to resist the criminality and victimization perpetrated by multinationals and generated by the prevailing global political economy Barak examines an array of multinational crimes corporate environmental financial and state and their state legal responses and outlines policies and strategies for revolutionizing these contradictory relations of capital reproduction criminality and unsustainability

System and Succession John D. Nagle,2014-08-27 System and Succession provides a comparative analysis of the social composition of national political leadership in the United States Russia Germany and Mexico These systems were chosen as case studies because their forms of government are representative of many others because they are conveniently suited for comparison and because they have high internal control over their own means of recruitment Drawing on a mass of data and an extensive bibliography Nagle s comprehensive study exhibits a mastery of the intricacies of these four quite divergent

political systems Complete time series data covering several generations of elite recruitment provide the basis for a new methodological approach to comparative elite analysis The author investigates among other issues elite displacements associated with revolution economic crises and postwar peace and prosperity Especially important differences along class and generational lines are found in the elite displacements associated with the revolutions in Germany 1918 Russia 1917 1921 and Mexico 1910 1920 The American case serves as a nonrevolutionary control case The overriding theoretical issue throughout System and Succession is the debate among Marxists radical democrats and pluralists over the importance of elite social composition for equitable representation of social or class interests Nagle develops a convincing argument supporting the Marxist thesis that the importance of class in elite recruitment is a defining characteristic of the political system System and Succession will be of particular interest to scholars in comparative politics Political scientists in other areas as well as historians and sociologists interested in the four countries examined will also find this book provocative

1974 Annual Supplement Joan Schmitz Bergholt, 2013-12-21 **Journal of Constitutional and Parliamentary Studies**, 1980 **Social Stratification and Inequality** Harold R.
