A systematical digest of the doctrines of Confucius, according to the Analects, Leaves of Healing ,1916 Great learning and Doctrine of the mean, tr. by P.G. von Moellendorff Ernst Faber, 1875 *Iean Gerson and the Last Medieval Reformation* Brian Patrick McGuire, 2010-11-01 In this biography of the noted French philosopher and theologian Jean Gerson the first since 1929 Brian Patrick McGuire presents a compelling portrait of Gerson as a voice of reason and Christian humanism during a time of great intellectual and social tumult in the late Middle Ages Born to a peasant father and mother in the county of Champagne Gerson 1363 1429 was the first of twelve children He overcame his modest beginnings to become a scholastic and vernacular theologian a university intellectual and a church reformer McGuire shows us the turning points in Gerson's life including his crisis of faith after becoming chancellor of the University of Paris in 1395 Through these key moments we see the deeper undercurrents of his mystical writings With their rich display of spiritual and emotional life these writings were to earn Gerson the appellation doctor christianissimus In turn they would influence many later thinkers including Nicholas of Cusa Ignatius of Loyola Francis de Sales and even Martin Luther Gerson is a man perhaps easier to admire than to love conscientious to a fault at once a pragmatist and an idealist in church politics a university intellectual who both fostered and distrusted the religious aspirations of the laity a powerful prelate who moved among the great yet never forgot his peasant origins a self revealing yet intensely private man who yearned for intimacy almost as much as he feared it McGuire ably situates Gerson in the context of his age an age replete with doctrinal controversies and the politics of papal schism on the eve of the Protestant Reformation Gerson emerges as a proponent of dialogue and discussion committed to reforming the church from within His courageous effort to renew the unity of a unique civilization bears examination in Bulletin Östasiatiska samlingarna (Stockholm, Sweden), 1946 our own time The Garden of Reality Roland Faber, 2018-06-20 The Garden of Reality contemplates the relativity of religious truth religious pluralism transreligious discourse postmodern cosmology and multireligious mysticism Its transreligious approach aims at a future multireligious peaceful society in an ecological and cosmic context It proposes that the future of humanity is bound to conviviality with itself and the Earth that the deepest religious motivations of existing together are relative to one another and that transreligious relativity is essential to the conviction of religions that their motivations experiences and conceptualities are meaningful real and true By engaging diverse voices from poststructuralism to Sufism Dzogchen and philosophical Daoism from conceptual frameworks of Christianity and Hinduism to mystical and postmodern cosmology current cosmopolitanism and interreligious and interspiritual discourses but especially understudied contributions of process thought and the Bah religion this book

suggests that multireligious conviviality must listen to the universal relevance of a multiplicity of minority voices Its polyphilic pluralism affirms the mutual immanence and co creative nature of religions and spiritualities with the universal in sistence of divine or ultimate reality in the cosmos Embracing a relativistic and evolutionary paradigm in an infinite cosmos of creative becoming religions must cope with events of novelty that disturb and connect transcend and contrast the continuum of their truth claims but must avoid conflict as religious diversity is enveloped by an ever folding landscape of ultimate reality The Freemasons' Library and General Ahiman Rezon Samuel Cole, Freemasons.
