What is Life? On Earth and Beyond Andreas Losch,2017-07-13 Approaches from the sciences philosophy and theology including the emerging field of astrobiology can provide fresh perspectives to the age old question what is life Has the secret of life been unveiled and is it nothing more than physical chemistry Modern philosophers will ask if we can even define life at all as we still don t know much about its origins here on Earth Others regard life as something that cannot simply be reduced to just physics and chemistry while biologists emphasize the historical component intrinsic to life on Earth How can theology constructively interpret scientific findings Can it contribute constructively to scientific discussions Written for a broad interdisciplinary audience this probing volume discusses life intelligence and more against the background of contemporary biology and the wider contexts of astrobiology and cosmology It also considers the challenging implications for science and theology if extraterrestrial life is discovered in the future *Multimodal Brain Tumor Segmentation and Beyond* Bjoern Menze,Spyridon Bakas,2021-08-10

Apoptosis and Beyond, 2 Volume Set James A. Radosevich,2018-12-27 These volumes teach readers to think beyond apoptosis and describes all of the known processes that cells can undergo which result in cell death This two volume source on how cells dies is the first comprehensive collection to cover all of the known processes that cells undergo when they die It is also the only one of its kind to compare these processes It seeks to enlighten those in the field about these many processes and to stimulate their thinking at looking at these pathways when their research system does not show signs of activation of the classic apoptotic pathway In addition it links activities like the
