

A photograph of a cemetery with large, ancient-looking trees and sunlight filtering through the leaves. The scene is peaceful and somewhat somber, with the sun creating a bright glow on the right side of the image. The trees have thick, gnarled trunks and dense foliage. In the background, several tombstones are visible, some of which are simple rectangular slabs, while others are more ornate. The ground is covered with fallen leaves and grass.

This book is designed to provide basic philosophy and information regarding the vast number of subject matters covered. This was assembled in the understanding that the publisher and the author are not engaged in rendering legal consultative or other professional services. If such expert assistance is required, the services of competent and appropriate professionals should be sought. The author and the publisher shall have neither liability nor responsibility to any person or entity with respect to any loss or damage that may be indirectly or directly caused or alleged to be caused by the content of this book. It is also not the purpose of this book to reprint information that is otherwise available to the author, publisher, or reader. Rather, it seeks to complement, amplify, and/or supplement other texts available. The reader is urged to review all relevant material and learn as much as possible about life, tailoring that information to their individual situation. Further efforts have been made to make this book as accurate as possible. However, there are undoubtedly editorial, typographical, and contextual errors contained herein. Therefore, the text should be viewed and utilized as a general guide, not as an ultimate source of information related to the various topics. This book also contains information that may no longer be relevant or accurate despite our desire to think our words and thoughts about life are timeless and perfect. Finally, the primary objective of this volume has something to do with the four Es: to enlighten, edify, educate, and entertain, perhaps even in that order. Personal philosophy and worldview are something we develop and maintain as individuals who evolve throughout life. It is the ambition of the writer to amplify these Es, hoping that in doing so, it will allow the reader to experience a more meaningful, balanced, complete, and productive encounter with life.

Worldview 101 Michael Jean Nystrom-Schut, 2004-06-02

In truth, just about anyone of us can scribble out a book about personal answers to the many questions of life. *Worldview 101* or *What is most basic and true to my own reality as a human upon the earth* is my own response to a number of different concerns and issues in life. You might think of this writing as a personal Plato's handbook, a general set of responses to the many questions of life. As its writer, it is only a part of the representation of my most current worldview. I say current because how we see the world is always in a state of movement. Concerning the book as you read it, do so with the approach that you are first taking into account my way of seeing things, thinking about it, and then re-shaping more of how you personally view things. See if you relate to what we think, this or what we came to know that. If you do adopt the idea as your own, if not, move on. In picking and choosing your position on the issues presented here, you will probably come to know more of what you are all about, more of what you know, you know. And what will that do? It will give you a perspective in higher thought, which is a good sort of perspective to possess. This you can hopefully use to govern your own life more personally. It can be very difficult to acclimate to this world of ours. Perhaps the thoughts in this book will help change or reshape your overall acclimation to life for the better. Knowing more never really stops. If life is meant for anything, for some reason that we don't really know about, it seems meant for us to learn more about being. In the end, it is this being part of us that relays a story. It also tells to others in our world who and what we are or were. Our lives are personal narratives and play out as such for each of us. Life speaks to our innermost parts; what is it saying?

to you We can hear the messages if we listen carefully

Principles of Philosophy Michael Jean

Nystrom-Schut,2018-10-30 Not just anyone sits down to write their own personal Bible The famous one popular with millions of Christians was penned by 35 40 different authors over a span of some 1100 years As of 1995 it was still considered Guinness the world s 1 best seller of all time In stark contrast Michael s 2 volume Principles of Philosophy was meditated contemplated drafted and written in deep anonymity and solitude over a daily and nightly 30 month span His two books come in at over 800 000 words the same as ten 80 000 word works With the King James Old and New Testament totaling just over 783 000 words it is easy to see why Michael views himself as both prolific plentiful and loquacious talkative when it pertains to laying down thought As the Bible is for millions on the planet Michael feels his principles are also a template an owner s manual a guidebook for in particular how to 1 view life on earth 2 work on the detail of one s philosophy and worldview and 3 examine and conduct a balanced meaningful existence on this planet The Holy Bible consists of 80 books 39 in the Old Hebrew part 14 in the Apocrypha and 27 in the New Christian part Michael s Principles Volumes One and Two each cover 84 chapters of the basic areas of life as he views them with 21 chapters outlined each for 1 the mental 3 the social and 2 the material 4 the spiritual areas of our lives A detailed numbering system is in place for quick reference to topics Each volume happens to come in at 613 entries making a total of 1226 separate entries in the two books By dictionary definition a principle is defined as a fundamental truth or proposition that serves as the foundation for a system of belief or behavior or for a chain of reasoning This is precisely why he chose principles in the title His own personal philosophical principles are what he tries to practice daily Michael even states they are likely the reason he is still with us in bodily form on the earth and remains in relative possession of his right mind as well Since leaving organized religion early on in life these tenants practiced in balance have been what Michael has focused on for several decades They work well for him In the course of these pursuits he says he has come to thousands of conclusions And they all point to the balanced life As he insists for him it is all about equivalent portions of mind mental body material relationships social and spirituality God the Universe Basically everything can be summed up within these four primary areas of life Michael seems to never hesitate to conclude that he has found his own personal means of salvation in the midst of pursuing his balance of the Principles of Philosophy Tanya Walker wife

My World MICHAEL JEAN NYSTROM-SCHUT,2004-05-19 Let me tell you how much fun it is to be a book writer One of my friends recently said to me I dont even know anyone whos ever READ a book let alone WRITE one I was amused Well you know its really not so hard to write a book You just talk about what you feel and organize your thoughts along the way At some point as you stay determined to make it happen the book comes into the world For me now having compiled over 30 book length manuscripts of various topics and subject matter I have become more and more inclined to share the

way I see the world with others along the way You might call what I like to write about as having to do with personal philosophy or individual world view Everyone has a way they see their world this book is part of how I see mine It seems that all kinds of people have something to say about what life is and is not I am like most people so am no exception I have come to enjoy giving such opinions and points of view with just about anyone who will listen I wrote this book MY WORLD The First 50 Years because I wanted to be sure and document the way life appeared to be to me at the half century mark in my personal growth and evolution I did it in a way that enables you to read right through it or if you prefer you can take it slowly over a one year span of time and think about the ideas and thoughts carefully How you read the book is entirely up to you Ten years earlier I had written a similar book Earth Dwelling An Owners Manual for Life in order to share thoughts about the meaning and purpose of life It is amazing the difference that ten years can make I like to think that I am growing Gee Could that be I sure hope so People from the worlds of philosophy religion and the popular culture are anxious to share the way they see the world with others I have a passion to do that also and so I wrote this book in order to summarize how things in life appeared to me I could be way off you decide for yourself At any rate my world is MY way of seeing life in YOUR world you will see it your special way and that is part of the beauty of this life Each person is free to see it differently and that is our basic right to do so I like that I actually feel so strongly about what I am saying here that I created a web site which is called HowIseetheworld.com to talk about and share ideas with others Take a look at it some time Thoughts are powerful and have a tendency to either make you great or even destroy you before your time So think good thoughts And enjoy the book as well
