 POLICY AND INSTITUTIONAL IMPLICATIONS FOR SUSTAINABLE DEVELOPMENT Policy Issues Institutional implications
 Regional Analysis Environmental Law and Governance for the Anthropocene Louis Kotzé, 2017-06-15 The era of eco crises
 signified by the Anthropocene trope is marked by rapidly intensifying levels of complexity and unevenness which collectively
 present unique regulatory challenges to environmental law and governance This volume sets out to address the currently
 under theorised legal and consequent governance challenges presented by the emergence of the Anthropocene as a possible
 new geological epoch While the epoch has yet to be formally confirmed the trope and discourse of the Anthropocene
 undoubtedly already confront law and governance scholars with a unique challenge concerning the need to question and
 ultimately re imagine environmental law and governance interventions in the light of a new socio ecological situation the
 signs of which are increasingly apparent and urgent This volume does not aspire to offer a univocal response to
 Anthropocene exigencies and phenomena Any such attempt is in any case unlikely to do justice to the multiple implications
 and characteristics of Anthropocene forebodings What it does is to invite an unrivalled group of leading law and governance
 scholars to reflect upon the Anthropocene and the implications of its discursive formation in an attempt to trace some initial
 often radical future facing and imaginative implications for environmental law and governance *Sustainable Development*
