Biosphere in an Era of Global Change Olivier Barrière, Mohamed Behnassi, Gilbert David, Vincent Douzal, Mireille Fargette, Thérèse Libourel, Maud Loireau, Laurence Pascal, Catherine Prost, Voyner Ravena-Cañete, Frédérique Seyler, Serge Morand, 2019-03-12 This book considers the principle of sustainable development which is currently facing a growing environmental crisis A new mode of thinking and positioning the ecological imperative is the major input of this volume The prism of co viability is not the economics of political agencies that carry the ideology of the dominant conventional economic schools but rather an opening of innovation perspectives through science This volume through its four parts more than 40 chapters and a hundred authors gives birth to a paradigm which crystallizes within a concept that will support in overcoming the ecological emergency deadlock **Biosphere Reserves and Sustainable Development Goals 1** Angela

Barthes, Catherine Cibien, Bruno Romagny, 2024-03-26 Since 1971 UNESCO's Man and the Biosphere MAB Programme has embraced a number of principles that link the political scientific and academic spheres Biosphere Reserves and Sustainable Development Goals 1 presents these areas as privileged spaces for experimenting with operating methods specific to cross cutting objectives and issues These areas encourage the development of interdisciplinary research supported by a worldwide network to disseminate experience approaches and knowhow The various global and local political scales are linked here with different consequences for the reconfiguration of local political arenas for specific modes of development linked to a renewed relationship with knowledge powers and institutions and for renewed relationships between the worlds of science education and territorial governance *Biosphere Reserves and Sustainable Development Goals 2* Bruno

Development Goals 2 is a reminder of the fundamental issues involved in governance The diversity and multiplicity of stakeholders and the complexity of the interplay between them as well as their organization are decisive factors in the proper management of resources and territories The book also presents a number of case studies demonstrating that between the strong development aspirations of their populations the impact of human activities and the need to conserve their biological heritage the biosphere reserves of the southern Mediterranean are facing major issues agricultural pollution forest fires water use in a context of climate change etc
