Sustaining Rapid Development In East Asia And The Pacific:

Sustaining Rapid Development in East Asia and the Pacific World Bank, 1993 Over the past quarter century per capita incomes in East Asia have nearly quadrupled and there has been a sharp reduction in poverty and notable social progress. Indeed with absolute poverty now down to about 11 percent of the population East Asia could overcome poverty and close the social gap with the industrial countries within a generation or so if it can meet the emerging challenges of the 1990s and sustain its rapid broadly based economic growth and social development. But several as yet unsolved problems such as infrastructural development enterprise reform and financial sector reform will have to be addressed with new urgency. And new concerns the rising environmental threat and changing international trade arrangements will test the region's innovative capacities. These themes are the subject of this book the first in the Development in Practice series on the World Bank's activities in specific regions and sectors. The series emphasizes the policies and practices that hold the most promise for reducing poverty in the developing world. In addition to numerous tables and figures in the text the booklet contains a comprehensive country by country statistical appendix. Sustaining Export-Oriented Development Ross Garnaut, Enzo Grilli, James Riedel, 1995-09-29 This book first published in 1995 looks at the East Asian economies post war development and assesses the possibilities of transferring East Asian development elsewhere. Written and edited by economists Sustaining Export Oriented Development traces the changes in the thinking of policy makers and advisers about the policies required for economic development especially the changed emphasis from import substitution to outward orientation which coincided with the East Asian economies success. Several contributors focus on identifying the key factors in the growth of these dynamic economies. Others look at future constraints such as the environmental limits to growth and

the sustainability of export growth in China This book makes a significant contribution to the discussion of economic growth and development issues and will be of interest to those in economics trade and aid and others concerned with public policy

World Bank East Asia and Pacific Economic Update April 2016 World Bank,2016-04-11 In the past 6 months developing East Asia and Pacific has faced a challenging external environment but growth has generally remained resilient Over the next 3 years growth is expected to ease modestly China will continue its gradual shift to a more sustainable growth path Some economies will be affected by low commodity prices and weaker external demand This outlook is subject to elevated risks Countries should prioritize monetary and fiscal policies that reduce their exposure to risks and strengthen market confidence In China there is a need to reduce leverage In several countries action is required to enhance transparency strengthen accountability and redefine the role of the state Efforts to reduce barriers to trade should be redoubled with a particular focus on non tariff measures and regulatory barriers including to trade in services The region must increase its readiness to benefit from the digital revolution and in particular develop the essential analog complements to digital technologies

The Asian Development Bank Nihal Kappagoda,1995 **Asia-Pacific Economies** Iyanatul Islam,Anis Chowdhury,1997 Why is the centre of international economic dynamism moving towards the countries of the East and South East Asia Are there common elements that explain this success Divided into two parts the authors consider the central debates concerning the developm **Power Transition in Asia** David Walton,Emilian Kavalski,2016-08-12 Current preoccupations with the rise of Asia attest to the nascent contestation of the very idea of what the pattern of international politics should look like and how it should be practiced In this respect the growing reference to a shift to the East in global politics has become a popular shorthand for the nascent power transition in world affairs This volume offers a detailed conceptual and empirical investigation of the dynamics of power transition in Asia and details the accommodation strategies and coping mechanisms of different small and middle powers in Asia and importantly China s responses to these approaches

Industrial Policies In The Pacific Gunnar K. Sletmo,2019-04-01 In GATT negotiations over the past several years the United States a founding member of the Asia Pacific Economic Cooperation Forum has been pushing hard for a global liberalization of trade in services This development would have special significance for the Pacific because of the intensifying competition between the United States and Japan for market shares A comprehensive analysis of the service sector s role in that dynamic region is offered in this timely volume Leading experts explore how service enterprises have affected trade in goods and transnational manufacturing forming a regional pattern of interdependence The authors assess each service sector from a regional perspective and offer detailed individual country studies as well The concluding chapters provide a broad overview of corporate strategies discuss questions of regional cooperation and identify opportunities for new regional service enterprises
