Taking Charge An Introduction To Electricity:

Taking Charge Larry E. Schafer, 2000 *Taking Charge* Larry E. Schafer, 1992 These teacher tested hands on activities use readily available materials and make students first exposure to electricity a fun one The unique historical approach of the first module introduces students to the ideas of Ben Franklin and other early explorers of electricity *Electricity and Magnetism, Grades 6 - 12* John B. Beaver, Ph.D., Don Powers, Ph.D., 2010-01-04 Reinforce good scientific techniques The teacher information pages provide a quick overview of the lesson while student information pages include Knowledge Builders and Inquiry Investigations that can be completed individually or as a group Tips for lesson preparation materials lists strategies and alternative methods of instruction a glossary an inquiry investigation rubric and a bibliography are included Perfect for differentiated instruction Supports NSE and NCTM standards plus the Standards for Technological Literacy *Electricity & Magnetism, Grades 5 - 12* John B. Beaver, Ph.D., Don Powers, Ph.D., 2003-01-01 Electricity and magnetism have never been so fun This comprehensive classroom supplement resource includes subject specific concepts and terminology inquiry based activities challenge questions extension activities assessments curriculum resources a bibliography and materials lists Topics covered include static charges magnetic fields understanding a compass lighting a bulb circuits and more It supports NSE and NCTM standards as well as Standards for Technological Literacy STL Mark Twain Media Publishing Company specializes in providing captivating supplemental books and decorative resources to complement middle and upper grade classrooms Designed by leading educators the product line covers a range of subjects including mathematics sciences language arts social studies history government fine arts and character Mark Twain Media also provides innovative classroom solutions for bulletin boards and interactive whiteboards Since 1977 Mark Twain Media has remained a reliable source for a wide variety of engaging classroom resources *Electricity & Magnetism, Grades 5 - 8* Beaver, Powers, 2002-09-27 Connect students in grades 5 and up with science using Electricity and Magnetism This 80 page book covers topics such as static charges magnetic fields understanding a compass lighting a bulb and circuits It contains subject specific concepts and terminology inquiry based activities challenge questions extension activities assessments curriculum resources a bibliography and materials lists The book supports National Science Education Standards NCTM standards and Standards for Technological Literacy **Brain-powered Science** Thomas O'Brien, 2010 How can a long metal needle pass through a balloon without popping it How can water flow at very different rates through two identical funnels How can a stick placed on a table under several sheets of newspaper and extended over the edge of a table snap when quickly struck without lifting or tearing the paper Author Thomas O'Brien takes these and 30 more science inquiry activities to a higher level in this book for educators who love to surprise and challenge their students with unanticipated results Using experiments based on the science of a discrepant event an experiment or demonstration in which the outcome is not what students expect O'Brien shows how learners can be motivated to reconsider their preconceived notions and think

more closely about what has actually occurred and the underlying scientific explanations What makes this volume more valuable than a mere activity book is the addition of a science education component to the extensive science content found in each activity Each discrepant event is shown to be analogous to a pedagogical principle Speaking directly to teachers O'Brien writes Your participation as teacher as learner experimenter rather than simply passive reader in these minds on activities will lead you to question and help you to revise your implicit assumptions about the nature of science teaching and learning At the same time you will develop expertise with activities that you can use with your own students The dual purpose activities thus allow you to unlock two doors with one key the doors to your own learning and to your students learning The detailed analogies between the activities and science learning make the book an ideal resource for middle and high school teachers science teacher educators and their preservice students and professional development specialists alike This thorough and thought provoking text includes more than 200 up to date internet resources as well as extensions to each of the physical science biology and chemistry activities bringing the total number of inquiry activities to nearly 120 Most important the author reminds teachers that the study of science is full of surprises and should be both meaningful and fun for students
