Tale Of The Unknown Island:

The Tale of the Unknown Island José Saramago, 2000-10-05 A dreamer petitions his king for a boat and gets more than he bargained for in this richly enigmatic short story by the Nobel Prize winning author. A man went to knock at the king's door and said Give me a boat. The king's house had many other doors but this was the door for petitions. But the king spent all his time sitting at the door for favors, favors being offered to the king, you understand, whenever he heard someone knocking at the door for petitions, he would pretend not to hear. So begins this beautifully illustrated and deceptively simple fable. Why the petitioner required a boat where he was bound for and who volunteered to crew for him, the reader will soon discover. In a departure from his linguistically dense and sprawling historical novels, José Saramago presents a philosophic love story worthy of Swift or Voltaire.

Romantic Dialogues and Afterlives Monika Coghén, Anna Paluchowska-Messing, 2020 Romantic writers often asserted their individuality but this assertion tended to take the form of positioning themselves in relation to other authors and literary texts. Thus they implicitly acknowledged the rich network of broadly understood poetic dialogue as an important and potent source for their own creativity. When in 1816 John Keats wrote "Great spirits now on earth are sojourning," he celebrated the originality of his contemporaries and the historical significance of his times, pointing to deep interest in the hum of mighty works in all the fields of human activity to which the nations ought to listen. Keats's sonnet suggests not only stimulating exchanges between poets, artists, and social thinkers in the same language but also the idea of transnational appreciation and dialogue. The volume takes up this idea and explores the dialogues of Romantic authors within the wide scope of European and American cultures. Essays by scholars from Germany, Britain, Bulgaria, Poland, Canada, and the United States of America examine Romantic writers' responses to their contemporaries, explore their dialogues with the culture of the past, and their interactions across the arts and sciences. They also scrutinize the Romantics' far-reaching influence on later writers and artists and thus extend the network of artistic exchange to modern times. The volume offers a rich tapestry of interconnections that span across time and space, interlace languages and cultures, and link Romantic writers and artists with their predecessors and successors across Europe and America. The essays in the collection invite the reader to join ongoing dialogues between writers and their audiences of the past and present.

Islands of the Mind Richard Pine, 2020-02-05 730 million people, almost 10% of the world's population, inhabit islands. One quarter of the states represented at the United Nations are islands. Islands constitute almost twenty percent of the total land area of Greece and exhibit more significant aspects of biodiversity than other global contexts. They are both occasions of triumph and occurrences of catastrophe. Islands are both open and enclosed communities, points of arrival and departure. Islands exert a fascination for the visitor and generate in the islander both positive and negative mindsets. The romantic fallacies about self-sufficiency and insularity of islands are constantly challenged. This collection of essays by scholars from some of the world's most compelling islands—Jersey, Ireland, Tasmania, Corfu, Eireikousa, Prince Edward

Island Malta explores the psychology of islands islanders and their visitors the literatures they stimulate and the scientific ethical and biogeographical issues they present in an increasingly globalised world Corfu the home of Lawrence and Gerald Durrell in the 1930s and host to literary and scientific enquiry is the place where this collection was conceived and occupies a central place in its discussions *Islands, Identity and the Literary Imagination* Elizabeth McMahon, 2016-07-09 Australia is the planet's sole island continent This book argues that the uniqueness of this geography has shaped Australian history and culture including its literature Further it shows how the fluctuating definition of the island continent throws new light on the relationship between islands and continents in the mapping of modernity The book links the historical and geographical conditions of islands with their potent role in the imaginaries of European colonisation It prises apart the tangled web of geography fantasy desire and writing that has framed the Western understanding of islands both their real and material conditions and their symbolic power from antiquity into globalised modernity The book also traces how this spatial imaginary has shaped the modern man who is imagined as being the island's mirror The inter relationship of the island fantasy colonial expansion and the literary construction of place and history created a new man the dislocated and alienated subject of post colonial modernity This book looks at the contradictory images of islands from the allure of the desert island as a paradise where the world can be made anew to their roles as prisons as these ideas are made concrete at moments of British colonialism It also considers alternatives to viewing islands as objects of possession in the archipelagic visions of island theorists and writers It compares the European understandings of the first and last of the new worlds the Caribbean archipelago and the Australian island continent to calibrate the different ways these disparate geographies unified and fractured the concept of the planetary globe In particular it examines the role of the island in this process specifically its capacity to figure a graspable globe in the mind The book draws on the colonial archive and ranges across Australian literature from the first novel written and published in Australia by a convict on the island of Tasmania to both the ancient dreaming and the burgeoning literature of Aboriginal and Torres Strait Islanders in the twenty first century It discusses Australian literature in an international context drawing on the long traditions of literary islands across a range of cultures The book's approach is theoretical and engages with contemporary philosophy which uses the island and the archipelago as a key metaphor It is also historicist and includes considerable original historical research **Shipwreck and Island Motifs in Literature and the Arts**, 2015-05-19 The motifs of island and shipwreck have been present in literature and the arts from ancient times Whether they occur as plot elements as part of literary or film imagery as symbols in paintings as leitmotifs in songs or as concepts in philosophical theories both have always been a source of fascination to authors artists and scholars In *Shipwreck and Island Motifs in Literature and the Arts* Brigitte Le Juez and Olga Springer have gathered essays that explore shipwreck and island figures in texts as historically culturally and artistically diverse as Walter Scott's *The Lord of the Isles* Cristina Fernández Cubas *The Lighthouse* reality TV series *Treasure Island* pop songs of the BBC Radio

The Unknown Island: a Tale of
A Responsibility to the World:

Saramago, Politics, Philosophy Burghard Baltrusch, Carlo Salzani, Kristof K. P. Vanhoutte, 2023-11-22 In a 1987 interview Jos Saramago eloquently expressed what could be considered his political philosophical manifesto Human beings should not content themselves with the role of mere observers They bear a responsibility to the world they must actively engage and intervene In 1998 the celebrated writer was honoured with the Nobel Prize for Literature So Saramago did not only as a human being and a citizen but also as an artist refuse to be a passive observer Despite his profound and always critical pessimism he tirelessly propelled both his public and artistic persona toward impactful actions and interventions showcasing an unwavering dedication to reshaping the world This volume seeks to delve into this facet of his legacy exploring it from diverse political and philosophical perspectives

Ecologies of Affect Tonya K. Davidson, Ondine Park, Rob Shields, 2013-06-01 *Ecologies of Affect* offers a synthetic introduction to the felt dynamics of cities and the character of places The contributors capture the significance of affects including desire nostalgia memory and hope in forming the identity and tone of places The critical intervention this collection of essays makes is an active consistent engagement with the virtualities that produce and refract our idealized attachments to place Contributors show how place images and attempts to build communities are rather than abstractions fundamentally tied to and revolve around such intangibles We understand nostalgia desire and hope as virtual that is even though they are not material they are nevertheless real and must be accounted for In this book the authors take up affect emotion and emplacement and consider them in relation to one another and how they work to produce and are produced by certain temporal and spatial dimensions The aim of the book is to inspire readers to consider space and place beyond their material properties and attend to the imaginary places and ideals that underpin and produce material places and social spaces This collection will be useful to practitioners and students seeking to understand the power of affect and the importance of virtualities within contemporary societies where intangible goods have taken on an increasing value

Cartographic Strategies of Postmodernity Peta Mitchell, 2013-01-11 The last fifty years have witnessed the growing pervasiveness of the figure of the map in critical theoretical and fictional discourse References to mapping and cartography are endemic in poststructuralist theory and similarly geographically and culturally diverse authors of twentieth century fiction seem fixated upon mapping While the map metaphor has been employed for centuries to highlight issues of textual representation and epistemology the map metaphor itself has undergone a transformation in the postmodern era This metamorphosis draws together poststructuralist conceptualizations of epistemology textuality cartography and metaphor and signals a shift away from modernist preoccupations with temporality and objectivity to a postmodern pragmatics of spatiality

and subjectivity Cartographic Strategies of Postmodernity charts this metamorphosis of cartographic metaphor and argues that the ongoing reworking of the map metaphor renders it a formative and performative metaphor of postmodernity

web to match matlab's bwlabel function if you want to match the output of matlab's bwlabel function bwlabel searches for connected components in column major or fortran order the above code searches in row major or c order

connected graph components matlab conncomp mathworks - Jul 20 2023

web connected graph components collapse all in page syntax bins conncomp g bins conncomp g name value bins binsizes conncomp description example bins conncomp g returns the connected components of graph g as bins the bin numbers indicate which component each node in the graph belongs to

sorting the connected component matlab answers mathworks - Jan 02 2022

web jun 16 2014 sorting the connected component learn more about connected component image processing sort image processing toolbox

how to find connected components in matlab stack overflow - Dec 13 2022

web jun 2 2013 function l c graph conn comp sa computing connected components of an undirected graph assuming sa is symmetric usage l c graph conn comp sa inputs sa sparse adjacency matrix for directed graph does not have to be symmetric outputs l components labels c number of

find and count connected components in binary image matlab bwconncomp - Aug 21 2023

web find the connected components in the array cc bwconncomp bw cc struct with fields connectivity 26 imagesize 3 3 3 numobjects 2 pixelidylist 5x1 double 3x1 double calculate centroids of the objects in the array s regionprops cc centroid s 2 1 struct array with fields centroid

connected component labeling wikipedia - Oct 11 2022

web algorithms the algorithms discussed can be generalized to arbitrary dimensions albeit with increased time and space complexity one component at a time this is a fast and very simple method to implement and understand it is

removed find strongly or weakly connected components in - Mar 04 2022

web a dfs based algorithm computes the connected components time complexity is $O(n + e)$ where n and e are number of nodes and edges respectively s c conncomp bgobj weak weakvalue indicates whether to find weakly connected components or strongly connected components

label and measure connected components in a binary image - Jun 19 2023

web there are three connected components using 4 connectivity but only two connected components using 8 connectivity you can calculate connected components by using the bwconncomp function in this sample code bw is the

connected component analysis in matlab stack overflow - Aug 09 2022

web nov 4 2015 i want to apply connected component analysis on a grey scale image with considering pixels whose grey level is more than a threshold then i want to remove those connected components whose length is less than a threshold please help me

connected component labeling steve on image processing with matlab - Apr 05 2022

web may 25 2007 in this part of the connected component labeling series i ll finally get to one of the algorithms actually used in the image processing toolbox it s based on connected component labeling part 6 steve on image processing with matlab

ordered connected components matlab answers matlab - Feb 03 2022

web mar 30 2014 ccnew pixelidylist woo for example if you choose the first edge point x_1 y_1 and you compute $\text{bwdistgeodesic}(bw, y_1, x_1, \text{cityblock})$ you will get a distance matrix whose values will be in the range 0 number of connected components 1 at the location x_1 y_1 of your first point the distance matrix value will be 0 those of the next

removed find strongly or weakly connected components in - Jul 08 2022

web a dfs based algorithm computes the connected components time complexity is $O(n + e)$ where n and e are number of nodes and edges respectively `scgraphconncomp` `gweak` `weakvalue` indicates whether to find weakly connected components or strongly connected components

implementing a connected component labeling algorithm from - Apr 17 2023

web mar 29 2020 what is connected component labeling visualization of an example code in matlab what is connected component labeling this is a computer vision algorithm to detect and count the number of connected regions also called blobs in a binary image often this is done after a segmentation algorithm

connected component labelling through matlab github - Jun 07 2022

web may 16 2019 this is a matlab function that utilises the image processing toolbox to convert any image to its edge image using canny algorithm and then label connected components in it the whole labelling algorithm is in a function that you can apply to any image the edge image goes through the labelling algorithm and final image is displayed

connected component labeling file exchange matlab - Mar 16 2023

web feb 10 2014 this function is partly based on the two pass algorithm described here [en.wikipedia.org/wiki/connected component labeling](https://en.wikipedia.org/wiki/Connected_component_labeling) i did not make use of the disjoint data set structure at least that i am aware of to connect the linked labels
