Singhvi, 1996-07-26 The text of the 1993 Rede Lecture with the final declarations of three major world conferences **The Rio Declaration on Environment and Development** Jorge E. Viñuales, 2015-02-05 The international community has long grappled with the issue of safeguarding the environment and encouraging sustainable development often with little result The 1992 Rio Declaration on Environment and Development was an emphatic attempt to address this issue setting down 27 key principles for the international community to follow These principles define the rights of people to sustainable development and the responsibilities of states to safeguard the common environment The Rio Declaration established that long term economic progress required a connection to environmental protection It was designed as an authoritative and comprehensive statement of the principles of sustainable development law an instrument to take stock of the past international and domestic practice a guide for the design of new multilateral environmental regimes and as a reference for litigation This commentary provides an authoritative and comprehensive overview of the principles of the Declaration written by over thirty inter disciplinary contributors including both leading practitioners and academics Each principle is analysed in light of its origins and rationale The book investigates each principle s travaux pr paratoires setting out the main points of controversy and the position of different countries or groups It analyses the scope and dimensions of each principle providing an in depth understanding of its legal effects including whether it can be relied before a domestic or international court It also assesses the impact of the principles on subsequent soft law and treaty development as well as domestic and international jurisprudence The authors demonstrate the ways in which the principles interact with each other and finally provide a detailed analysis of the shortcomings and future potential of each principle This book will be of vital importance to practitioners scholars and students of international environmental law and sustainable development
