Don't Make War Colin S. Gray, 1993 Weaponry does not equal strategy argues Colin Gray but the two are often confused resulting in such linguistic errors as strategic weapons There may be an interactive relationship between policy strategy and weaponry but he contends policy and strategy always take the front seat

**The United States and the New Middle East** Robert Edwards Hunter, Lee Hamilton, 1992 *Our New National Security Strategy* James J. Tritton, 1992-09-30 This book is an analysis of President Bush's Regional Defense Strategy first unveiled in Aspen Colorado on August 2 1990 This strategy involves a mix of active reserve and reconstitutable forces and General Colin Powell's Base Force If implemented the new strategy and force structure would return significant U S ground and air forces to the continental United States where most would be demobilized In the event of a major crisis the United States would rely on active and reserve forces for a contingency response much as was done for Operation Desert Storm The new national security strategy is based upon the 25 percent budget cut negotiated with Congress a greatly depleted Russian threat and a new international security environment that assumes two years warning of a European centered global war with the former USSR There are four major critical factors upon which the new strategy depends 1 the continued decline of the Russians as a threat to world stability 2 the ability of the intelligence community to meet new challenges 3 the behavior of the allies and Congress and 4 the ability of industry to meet new demands The new strategy is not simply an adjustment to existing defense doctrine or strategy but rather a fundamental revision of the way the United States has approached defense since 1945 Students and scholars interested in politico military strategy and government policy will find this book of great interest

**The Army after Next** Thomas K. Adams, 2006-10-30 This book recounts the successes and failures of the US Army's Army Transformation program in the larger context of the Department of Defense's overall military transformation effort Spurred by the belief that RMA represented the future the Department of Defense DoD set out to transform the U S armed forces by adopting RMA concepts Led by President George W Bush and Defense Secretary Donald Rumsfeld the DoD spent billions in an attempt to make the hypothetical capabilities real changing the entire structure of the armed forces as a result The services the media Congress and the military industry each had its own agenda all of which continue to come into play in the development of RMA strategies The interplay of politics technology and military reality offers a fascinating narrative Sure to be found controversial by some compelling by all this is the only available book length examination of the way the U S Army and Department of Defense have tried to create the capabilities promised by the high tech Revolution in Military Affairs Of more immediate concern it is also the only in depth account of the effect RMA and transformation concepts had on the American operations in Afghanistan and Iraq Many of the problems in both Iraq and Afghanistan author Thomas K Adams argues arose from the DoD's implacable desire to implement RMA driven transformation concepts whether they were appropriate or not What we need to do he maintains is to fight the war we have not the war we want
