Modern War: A Very Short Introduction Richard English, 2013-07-25 Warfare is the most dangerous threat faced by modern humanity. It is also one of the key influences that has shaped the politics, economics, and society of the modern period. But what do we mean by modern war? What causes modern wars to begin? Why do people fight in them? Why do they end? and what have they achieved? In this accessible and compelling Very Short Introduction, Richard English explores the assumptions we make about modern warfare and considers them against the backdrop of their historical reality. Drawing on the wide literature available, including direct accounts of the experience of war, English provides an authoritative account of modern war: its origins, evolution, dynamics, and current trends.

Conceptualizing Terrorism Anthony Richards, 2015-09-24 Conceptualizing Terrorism argues that in the post 9/11 world, the need for an internationally agreed definition of terrorism is more important than it has ever been, despite the challenges that such an endeavour presents. Indeed, in a global context where the term is often applied selectively and pejoratively according to where one's interests lie, there is a real need to instill some analytical quality into the concept of terrorism, not least in order to prevent the term being manipulated to justify all manner of counter-terrorism responses. Not only is this important for the policymaking context, but it is also an imperative task within academia in order to strengthen the theoretical foundation of terrorism studies. For all other terrorism-related theories rest on what one means by terrorism in the first place. Written from an academic perspective, the book explores the prospects for terrorism as an analytical concept. Arguing that the essence of this particular form of political violence lies in its intent to generate a psychological impact beyond the immediate victims, it goes on to propose the adoption of three key preliminary assumptions that have implications for the definitional debate and that it suggests might help to increase the analytical potential of terrorism. The book then considers potential elements of a definition before concluding with its own conceptualization of terrorism.

Terrorist Histories Caoimhe Nic Dhaibheid, 2016-11-03 This book addresses, provides a series of in-depth portraits of men and women who have been labelled terrorists from the 19th, 20th, and 21st centuries. Bridging historical methodologies and theoretical approaches to terrorism studies, it seeks to contribute to the developing historicising of terrorism studies. This is achieved principally through a prosopographical approach. In the preponderance of detailed statistical and quantitative data on the practice of terrorism and political violence, the individuals who participate in terrorist acts are often obscured. While ideologies and organisations have attracted much scholarly interest, less is known of the personal trajectories into political violence, particularly from a historical perspective. The focus on a relatively narrow cast of high-profile terrorist villains, to a large part driven by popular and media attention, results in a

somewhat skewed picture of equal value arguably is a more sustained reflection on the lives of lesser known individuals The book sits at the juncture between terrorism studies historical biography and ethnography It comprises case studies of ten individuals who have engaged in political violence in the nineteenth twentieth and twenty first centuries in a number of locations and with a variety of ideological motivations from Russian inflected anarchism to Islamist extremism Through detailed empirical research crucial themes in the study of terrorism and political violence are explored the diverse individual radicalisation pathways the question of disengagement and re engagement various counter terrorist and counter insurgency strategies adopted by governments and security forces and the changing nature and perception of terrorism over time Although not explicitly comparative a number of themes resonate between the case studies which will be drawn together in the conclusion to this book These include the role of migration in radicalisation the influence of radical family heritages the experience of imprisonment and the narratives which individuals construct to tell their own terrorist life stories It also provides an historically grounded answer to one of the most contentious and heated debates in recent literature on terrorism studies what leads a person to turn to political violence In examining the life narratives of a diverse range of men and women who at some point embraced violence this book seeks to contribute to a growing understanding of the entire arc of a terrorist lifespan from radicalisation to mobilisation to disengagement and beyond This book will be of much interest to students of political violence terrorism studies security studies and politics in general

Commitment and Complicity in Cultural Theory and Practice B. Firat, S. De Mul, S. Van Wichelen, Sarah De Mul, Sonja Van Wichelen, 2009-05-21 An international line up of scholars examines the role of the intellectual in the twenty first century looking at the gap between contemporary cultural theory and cultural practice and asking whether knowledge and methodologies in the humanities can intervene in everyday politics and vice versa

Ethics and International Relations Gordon Graham, 2008-02-26 Ethics and International Relations Second Edition offers a comprehensive introduction to the philosophical issues raised by international politics Presupposing no prior philosophical knowledge and deliberately avoiding the use of technical language it is ideally suited for political philosophy applied ethics and international relations courses Revised and updated new material includes coverage of the war on terror the impact of globalization and ideas of cosmopolitan governance Clearly and thoughtfully organized it proceeds logically from general morality and international relations to issues surrounding just war theory and global justice A crisp analytical treatment presented with a student sensitive approach and informed by real world issues Covers a wide array of subtopics

A Critical Theory of Counterterrorism Sondre Lindahl, 2018-06-27 This book offers a theory and model of counterterrorism based on emancipation and non violence Critical Terrorism Studies CTS scholars have produced wide ranging and rich critiques of terrorism related research as well as state counterterrorism policies and practices This work aims to fill in a gap in the current literature by constructing an original and specifically CTS model of counterterrorism The model outlines the basic assumptions priorities principles strategies and tactics measures and evaluation of counterterrorism

It challenges prevalent models of counterterrorism through a radical rethinking of the ontology epistemology and the agenda of counterterrorism The model aims to prevent future acts of terrorism by 1 re conceptualising how we study and understand terrorism and 2 suggesting that our efforts to counter and prevent terrorism must commensurate with the goals we want to achieve Essentially this involves a commitment to emancipation and a rejection of violence as a tool The second part of the book is a case study of Norwegian counterterrorism which shows how the theory and model developed in the book can be used This is the first substantial analysis of Norwegian counterterrorism in almost ten years and produces encouraging findings which support the potential for non violent solutions to terrorism This book will be of particular interest to students of terrorism and counterterrorism critical security studies and international relations in general
