

Refer to the table of estimated regressions below, computed using data for 1999 from all 420 K–6 and K–8 districts in California, to answer the following question. The variable of interest, *test scores*, is the average of the reading and math scores on the Stanford 9 Achievement Test, a standardized test administered to fifth–grade students. School characteristics (average across the district) include enrollment, number of teachers (measured as “full–time equivalents”), number of computers per classroom, and expenditure per student.
