Text And Graphics In The Electronic Age Desktop Publishing For Scientists:

Text and Graphics in the Electronic Age William E. Russey, Claus Bliefert, Christophe Villain, 1995 The definitive guide to desktop publishing for the scientific community With this indispensable guide every scientist can acquire the skills and information necessary to prepare high quality camera ready copy for professional publication Comprehensive well structured and extensively illustrated the book describes state of the art techniques for manuscript preparation with special emphasis on the scientist's needs In depth discussions treat all aspects of the subject including various types of 2electronic manuscripts 2 fundamentals of typography and typesetting rules techniques for dealing with mathematical expressions practical and aesthetic considerations in page layout and book design Hardware and software issues The majority of the programs described are available for both Windows™ and Apple Macintosh™ users and the general principles discussed apply to essentially any modern computer system Three practicing chemists one American one German and one French all actively involved over a long period of time in professional desktop publishing have joined together to share with others their collective experience and insights

The Art of Scientific Writing Hans F. Ebel, Claus Bliefert, William E. Russey, 2004-03-12 Most scientists live in a publish or perish environment but few would describe themselves as brilliant or enthusiastic writers Coming to the aid of all those wishing to improve the quality of their scientific writing established researchers and aspiring students alike three experienced authors scientists from differing backgrounds and cultures have compiled this classic guide This new edition has been completely revised to reflect dramatic changes in communication over the past 15 years The primary emphasis is on writing techniques accurate expression adherence to accepted standards and above all clarity but the authors also venture into communication technology and organizational as well as ethical aspects of science Numerous appendices and a particularly comprehensive index complete this highly useful book The authors have a passion not only for clarity and economy of style but also for precision and consistency Nature A wealth of information contained in a single book of manageable proportions Students reporting on a simple laboratory experiment and their teachers preparing a paper or lecture will both find this book a constant companion European Science Editing The book under review claims we know of no book as broad in its coverage as critical in its analysis of existing trends and as international in its scope This claim is immodest but accurate Trends in Pharmacological Sciences *Walford's Guide to Reference Material: Science and technology* Albert John Walford, Library Association, 1996

Federal Scientific and Technical Information in an Electronic Age United States. Congress. Office of Technology Assessment, 1989 **The Craft of Scientific Writing** Michael Alley, 2013-04-18 In October 1984 the weak writing in a scientific report made national news The report which outlined safety procedures during a nuclear attack advised industrial workers to don heavy clothes and immerse themselves in a large body of water The logic behind this advice was sound Water is a good absorber of heat neutrons and gamma rays Unfortunately the way the advice was worded was unclear Was everyone supposed to come up for

air Be completely submerged The writing conveyed the wrong impression to the public The report came across as saying go jump in a lake not the impression you want to give someone spending thousands of dollars to fund your research Chances are that Dan Rather will not quote your documents on national television Still your writing is important On a personal level your writing is the way in which people learn about your work When you communicate you receive credit for your work When you do not communicate or are too slow to communicate the credit often goes to someone else On a larger level your writing and the writing of other scientists influence public policy about science and engineering

Advances In Chinese Document And Text Processing Cheng-lin Liu, Yue Lu, 2017-03-14 The book is a collection of invited chapters by experts in Chinese document and text processing and is part of a series on Language Processing Pattern Recognition and Intelligent Systems The chapters introduce the latest advances and state of the art methods for Chinese document image analysis and recognition font design text analysis and speaker recognition Handwritten Chinese character recognition and text line recognition are at the core of document image analysis DIA and therefore are addressed in four chapters for different scripts online characters offline characters ancient characters and text lines Two chapters on character recognition pay much attention to deep convolutional neural networks CNNs which are widely used and performing superiorly in various pattern recognition problems A chapter is contributed to describe a large handwriting database consisting both online and offline characters and text pages Postal mail reading and writer identification addressed in two chapters are important applications of DIA The collection can serve as reference for students and engineers in Chinese document and text processing and their applications

The Year's Best Science Fiction: Ninth Annual Collection Gardner Dozois, 1992-06-15 In The Year s Best Science Fiction

Ninth Annual Collection Gardner Dozois produces another volume in the series that Locus calls the field's real anthology of record. With a unique combination of foresight and perspective, Dozois continues to collect outstanding work by newcomers and established authors alike, reflecting the present state of the genre while suggesting its future directions. With the editor's annual summary of the year in the field and his appendix of recommended reading, this book is indispensable for anyone interested in contemporary science fiction.
