The Art And Science Of Victorian History:

The Art and Science of Victorian History Rosemary Jann, 1985 *Sentimental Masculinity and the Rise of History, 1790-1890* Mike Goode, 2009-05-14 Challenges the received account of the way in which modern historical thought developed in the nineteenth century **Writing Women's History Since the Renaissance** Mary Spongberg, 2017-03-08 The complaint of Catherine Morland in Jane Austen's *Northanger Abbey* that history has hardly any women at all is not an uncommon one Yet there is evidence to suggest that women have engaged in historical writing since ancient times This study traces the history of women's historical writing reclaiming the lives of individual women historians recovering women's historical writings from the past and focusing on how gender has shaped the genre of history Mary Spongberg brings together for the first time an extensive survey of the progress of women's historical writing from the Renaissance to the present demonstrating the continuities between women's historical writings in the past and the development of a distinctly woman-centred historiography *Writing Women's History since the Renaissance* also examines the relationship between women's history and the development of feminist consciousness suggesting that the study of history has alerted women to their unequal status and enabled them to use history to achieve women's rights Whether feminist or anti-feminist women who have had their historical writings published have served as role models for women seeking a voice in the public sphere and have been instrumental in encouraging the growth of a feminist discourse *Alternate Histories and Nineteenth-Century Literature* Ben Carver, 2017-10-17 This book provides the first thematic survey and analysis of nineteenth-century writing that imagined outcomes that history might have produced Narratives of possible worlds and scenarios referred to here as alternate histories proliferated during the nineteenth century and clustered around pressing themes and emergent disciplines of knowledge This study examines accounts of undefeated Napoleons after Waterloo alternative genealogies of western civilization from antiquity to the nineteenth-century present day the imagination of variant histories on other worlds lost world fictions that discovered improved relations between men and women and the use of alternate history in America to reconceive the relationship between the New World and the Old The untimely imagination of other histories interrogated the impact of new techniques of knowledge on the nature of history itself This book sheds light on the history of speculative thought and the relationship between literature and the history of ideas in the nineteenth century *Harriet Martineau and the Birth of Disciplines* Valerie Sanders, Gaby Weiner, 2016-07-15 One of the foremost writers of her time Harriet Martineau established her reputation by writing a hugely successful series of fictional tales on political economy whose wide readership included the young Queen Victoria She went on to write fiction and nonfiction books articles and pamphlets popular travel books and more insightful analyses Martineau wrote in the middle decades of the nineteenth century at a time when new disciplines and areas of knowledge were being established Bringing together scholars of literature history economics and sociology this volume demonstrates the scope of Martineau's writing and its importance to nineteenth-century politics and

culture Reflecting Martineau's prodigious achievements the essays explore her influence on the emerging fields of sociology history education science economics childhood the status of women disability studies journalism travel writing life writing and letter writing As a woman contesting Victorian patriarchal relations Martineau was controversial in her own lifetime and has still not received the recognition that is due her This wide ranging collection confirms her place as one of the leading intellectuals cultural theorists and commentators of the nineteenth century

Reimagining the Historian in Victorian England Elise Garritzen, 2023-08-08 What constitutes a historian What skills and qualities should a historian cultivate Who is entitled to define historians physiognomy Victorians sought to answer these questions as history transformed from a Romantic literary pursuit into a modern discipline during the second half of the nineteenth century This book offers a novel interpretation of this critical historiographical period by tracing how historians forged themselves a collective scholarly persona that legitimized their new disciplinary status By combining historiography and book history Elise Garritzen argues that historians appropriated titles prefaces footnotes and other paratexts as an institutionalized space for fashioning the persona Yet historians did not have a monopoly on the persona as readers and reviewers offered their interpretations of the persona and publishers influenced the paratextual presentation of the persona By ascribing agency to paratexts and the literary marketplace Garritzen makes an important shift in the way we perceive the formation of scholarly personae and modern disciplines The book offers a novel approach to the role which scholarly virtues held in the Victorian society the formation of scholarly communities the commodification of knowledge and the management of scientific reputations It provides new insights for scholars interested in the history of humanities science and knowledge book history and Victorian culture

Free Will and the Human Sciences in Britain, 1870-1910 Roger Smith, 2015-07-28 From the late nineteenth century onwards religion gave way to science as the dominant force in society This led to a questioning of the principle of free will if the workings of the human mind could be reduced to purely physiological explanations then what place was there for human agency and self improvement Smith takes an in depth look at the problem of free will through the prism of different disciplines Physiology psychology philosophy evolutionary theory ethics history and sociology all played a part in the debates that took place His subtly nuanced navigation through these arguments has much to contribute to our understanding of Victorian and Edwardian science and culture as well as having relevance to current debates on the role of genes in determining behaviour

Rethinking British Romantic History, 1770-1845 Porscha Fermanis, John Regan, 2014 Rethinking British Romantic History 1770 1845 brings together a team of leading scholars to examine the interactions between history and literature in the Romantic period focusing on practical as well as theoretical interconnections between the two genres and disciplines

Samuel Rawson Gardiner and the Idea of History Mark Nixon, 2011 Samuel Rawson Gardiner 1829 1902 is the colossus of seventeenth century historiography His twenty volume history of Britain from 1603 to 1656 and his many editions of key texts still serve to underpin almost all study of the Civil Wars and of the Commonwealth and

Protectorate Yet despite his importance his work has often been reduced by historians of historiography to simple caricature in which his personal politics and his denominational allegiances got the better of his worthy empiricism This book seeks to challenge the inadequate view of him and his work offering a rich contextualisation by locating his writings within a wide range of literary and philosophical milieux British and continental European In so doing it not only suggests new ways of looking at Victorian historiography in general but also proposes a new approach to the growing history of historical writing
