The Hamlyn Of Tropical Freshwater Fish:

Tropical Aquarium Fishes Dick Mills, 1988 **The Cichlid Fishes** George Barlow, 2008-12-15 Cichlid fishes are amazing creatures In terms of sheer number of species they are the most successful of all families of vertebrate animals and the extent and speed with which they have evolved in some African lakes has made them the darlings of evolutionary biologists But what truly captivates biologists like George Barlow not to mention thousands of aquarists the world over is the complexity of their social lives and their devotion to family most species of cichlids are monogamous and many pairs share the responsibility of raising offspring In this wonderful book Barlow describes the unusually high intelligence of these fishes their complex mating and parenting rituals their bizarre feeding and fighting habits and the unusual adaptations and explosive rate of speciation that have enabled them to proliferate and flourish A celebration of their diversity *The Cichlid Fishes* is also a marvelous exploration of how these unique animals might help resolve the age old puzzle of how species arise and evolve *The Tetra Encyclopedia of Freshwater Tropical Aquarium Fishes* Dick Mills, Gwynne Vevres, D. L. Mills, 1989
