Techniques Jörg Dünne, Kathrin Fehrer, Kristina Kuhn, Wolfgang Struck, 2020-08-24 This volume presents the preliminary
results of the work carried out by the interdisciplinary cultural techniques research lab at the University of Erfurt Taking up
an impulse from media studies its contributions examine from a variety of disciplinary perspectives the interplay between the
formative processes of knowledge and action outlined within the conceptual framework of cultural techniques Case studies in
the fields of history literary and media studies and the history of science reconstruct seemingly fundamental demarcations
such as nature and culture the human and the nonhuman and materiality and the symbolical order as the result of concrete
practices and operations These studies reveal that particularly basic operations of spatialization form the very conditions that
determine emergence within any cultural order Ranging from manual and philological paper work to practices of opening up
and closing off spaces and collective techniques of assembly these case studies replace the grand narratives of cultural
history focusing on micrological examinations of specific constellations between human and nonhuman actors
