Jeannette A. Bastian

The Archival Enterprise Modern Archival Principles Practices And Management Techniques:

The Archival Enterprise Bruce William Dearstyne, 1993 The Archival Enterprise from the first word recognises professional archival work as an enterprise a big bold and sometimes difficult undertaking requiring energy and initiative Canons of good practice tightened educational guidelines and a certification programme indicate the dynamic adaptive and ever changing nature of the archival profession Reflecting the belief that archival work is fundamentally important to society culture education and economic progress this work introduces archival theory and practice describes the elements of historical records programmes explains archival techniques and procedures and analyses issues and challenges facing the profession today

The Archival Enterprise Bruce William Dearstyne, 1993 Reference Services for Archives and Manuscripts Laura B Cohen, 2012-11-12 Like their librarian colleagues reference archivists mediate between the user and the source material However given the nature of archival materials and of their holding repositories unique issues arise While such matters as provenance and original order and access and security continue to be vital underpinnings of their work a myriad of other issues comes into play as reference archivists attempt to balance the competing demands of donors researchers the public and the press From the creation and dissemination of finding aids for electronic resources to the implementation of marketing strategies to increase support and strengthen service Reference Services for Archives and Manuscripts shows you how to thrive in the changing world of archival reference Intended to foster an appreciation of the issues both within and beyond the field of archives Reference Services for Archives and Manuscripts reveals that today s archivist is straddling the world of the traditional with the world of the new The book establishes its value as it guides you through new concerns such as how to take advantage of technological developments in appraisal accession and preservation address copyright privacy and funding issues for electronic resources mount archival cataloging records on local and wide area databases create a publicly available site on the Internet improve in house access tools professional abilities and the caliber of public service address security issues and respond to theft Reference Services for Archives and Manuscripts also helps you by preparing you for changes in the relationship between archivist and researcher that will inevitably occur with further changes in technology Other vital issues discussed are improved access for unserved and underserved groups a revision in ethical codes and the ability of archivists to become more customer centered

Archiving Cultures Jeannette A. Bastian, 2023-03-29 Archiving Cultures defines and models the concept of cultural archives focusing on how diverse communities express and record their heritage and collective memory and why and how these often intangible expressions are archival records Analysis of oral traditions memory texts and performance arts demonstrate their relevance as records of their communities Key features of this book include definitions of cultural heritage and archival heritage with an emphasis on intangible cultural heritage Aspects of cultural heritage such as oral traditions performance arts memory texts and collective memory are placed within the context of records and archives It presents strategies for reconciling intangible and tangible

cultural expressions with traditional archival theory and practice and offers both analog and digital models for constructing cultural archives through examples and vignettes The audience includes archivists and other information workers who challenge Western archival theory and scholars concerned with interdisciplinary perspectives on tangible and intangible cultural heritage This book is relevant to scholars involved with non textual materials and will appeal to a range of academic disciplines engaging with the archive Academic Archives Aaron D. Purcell,2012-02-09 Academic Archives is designed to appeal to archivists of all ranks and experience archivists working both inside and outside of academic libraries archivists in training other information professionals library directors and members of the academic community *Developing and Maintaining Practical Archives* Gregory S. Hunter,2020-04-14 Newly revised and updated to more thoroughly address our increasingly digital world including integration of digital records and audiovisual records into each chapter it remains the clearest and most comprehensive guide to the discipline Archival Appraisal Barbara Craig,2005-04-25 No detailed description available for Archival Appraisal **The First Generation of Electronic Records Archivists in the United States** Richard Cox,2020-07-26 This book helps readers understand the current status of archivists in the United States It addresses issues of professionalization by re examining two major aspects of the archival community institutional forms and structures and the basic educational foundations that are important to any profession While United States archivists now seem poised to develop new approaches to the management of electronic records including research and education venues this profession s long journey to reach this point is an interesting step on the continuing road to professionalization The First Generation of Electronic Records Archivists in the United States represents the first major study of how and why American archivists have struggled to contend with the management of electronic records The book provides a framework for studying this issue includes suggestions for additional research and serves as a basis for discussion about the continued strengthening of the archival profession Despite more than thirty years of striving to manage electronic records American archivists have not developed an effective infrastructure for this purpose The First Generation of Electronic Records Archivists in the United States considers the evidence for this failure by evaluating archival literature on the topic of electronic records management It examines how position descriptions in state government archives and job advertisements across the discipline have reflected a bias toward paper based formats and the failure of graduate and continuing archival education programs to deal effectively with electronic records The book details state government archives and position descriptions trends and practices in the Information Age 1976 1990 graduate archival education and electronic records an analysis of current approaches and their strengths and weaknesses the effectiveness of the NAGARA Institute as a form of advanced archival education problems challenges opportunities and needs for additional researchThe First Generation of Electronic Records Archivists in the United States is an enlightening study for library and information science educators archival graduate students and archivists themselves as they work toward the professionalization of their field **Managing Historical Records**

Programs Bruce W. Dearstyne, 2000-09-20 Historical records are a focus and collecting area for many historical societies history museums and other historical agencies Yet many historical records programs face special challenges and needs from inadequate resource levels physical preservation problems under developed documentation appraisal and collecting policies etc In Managing Historical Records Dearstyne's goal is to foster stronger more vibrant historical records programs by introducing archival work and describing strategies approaches principles and practices of strong programs Lots of examples checklists and appendices help in finding solutions and approaches A must have resource for anyone considering starting a historical records program or who already has one and wants to strengthen it

Managing Records as Evidence and Information Richard J. Cox, 2000-12-30 For the past three decades policies regarding a variety of information issues have emanated from federal agencies legislative chambers and corporate boardrooms Despite the focus on information policy it is still a relatively new concept and one only now beginning to be studied The subject area is wider than believed archives and records policies information resources management information technology telecommunications international communications privacy and confidentiality computer regulation and crime intellectual property and information systems and dissemination This is not a compendium of policies to be used but rather an exploration in a more detailed fashion of the fundamental principles supporting the setting of records policies Records policies are critically important for records professionals to develop and use as a means of strategically managing the information and evidence found in the millions of records created daily provided that the policies are based on comprehensible principles This is a series of discourses on the fundamentals of archives and records management needing to be understood before any organization attempts to define and set any policy affecting records and information The chapters concern defining records how information technology plays into policy compiling the fundamental tasks of identifying and maintaining records as critical to records and information policy public outreach and advocacy as a key objective for such policy and the role of educating records professionals in supporting sensible records policies
