English Teaching Forum, 2009 *Make Yourself a Master of English*, Forum, 1982 **Writing: Step by Step** Randy Devillez, 2003-05-30 What are your students goals *Research in Basic Writing* Martin Jacobi, Michael G. Moran, 1990-02-15 This reference handbook surveys research on the central issue associated with the teaching of unprepared writers Though basic writing has only been recognized as a distinct area of teaching and research since 1975 the existing bibliographic texts already seem limited due to their age or lack of annotation This volume provides current and extensive bibliographic essays and will help to define this new field of study for teachers and researchers Following an introduction that summarizes the origins and significant texts in basic writing the book is divided into three sections Social Science Perspectives Linguistic Perspectives and Pedagogical Perspectives The first section which contains three essays views the field through the lens of social psychological and political issues The second section also containing three essays examines contributions made from studies of grammar dialects and second language acquisition The third section in its four essays focuses on the design development administration and evaluation of basic writing courses the use of computers in basic writing classrooms the role of the writing lab and the preparation of basic writing teachers An appendix that reviews current textbooks for basic writing courses is also included as well as an index This book will be a valuable resource for teachers of basic writing in education courses and workshops that train teachers and tutors and in fields such as linguistics technical writing and Teaching English as a Second Language It will also be an important addition to public and university libraries and many education programs **Creating Texts** Walter Nash, David Stacey, 2014-09-25 Creating Texts emphasises a practical approach to composition and enables students to understand what is involved in the creation of a text and to learn from the practice of other writers Extensively rewritten and updated from Walter Nash's earlier volume *Designs in Prose* attention is paid to the general theory of composition in both traditional and original terms so that students are made familiar with the basic resources of composition in grammar and in the lexicon The essence of every chapter is the discussion of examples of text sometimes devised by the authors but more often drawn from the work of authors writing in diverse styles of English This practical approach is most evident in the final section of the book where detailed suggestions for projects and exercises reinforce the connection between theory and practice and encourage students to develop their creative sense and

to adapt their style of writing to fit the particular audience and context In addition this section is cross referenced to the main text to allow students to consult easily the relevant chapter
