Steroid Protein Interactions:

Steroid-Protein Interactions Ulrich Westphal, 2012-12-06 This is the story of steroid protein interactions as one investigator sees it Following the general concept of this monograph series it emphasizes the results and interpretations obtained in the author's laboratory and is therefore a subjective account Recognizing however that the discussion of the subject would be incomplete if the material were limited to one scientist's work the essential achievements of other investigators have been incorporated An effort has thus been made to give a balanced presentation and to enable the reader to see in perspective the varied facets of the interactions between steroids and proteins Since this is the first comprehensive treatment of the topic it seems appropriate to go to the roots and try to find out how it all started The first chapters therefore take the reader to the laboratories of those who very early conceived the significance of the attachment of dyes drugs and other conspicuous molecules to those colloids called proteins The discovery of the steroid hormones set the stage for meaningful investigation of their interaction with proteins of various origins and functions a process which is continuing today with increasing vigor *Steroid-Protein Interactions II* Ulrich Westphal, 2012-12-06 [Steroid-protein interactions : basic and clinical aspects : Second International Symposium on Binding Proteins](#) Roberto Frairia, 1988 *Steroid Protein Interactions* H. Leon Bradlow, International Symposium on Binding Proteins (2, 1987, Torino), Italian Cancer Society, Italian Endocrine Society, University of Turin, 1988 *Steroid-protein Interactions* J. Victor Balldridge, 1971 *Steroid-Cell Interactions* R. J. B. King, W. I. P. Mainwaring, 2014-05-20 Steroid Cell Interactions describes the processes involved in the intracellular binding of steroids and related compounds in mammalian cells Serum binding proteins and steroid immunoglobulin interaction are also discussed along with the relationship of these binding processes to the biological action of the steroid This book consists of 10 chapters and begins by presenting an elementary account of the factors contributing to the interaction between a steroid hormone and another molecule The discussion then turns to the three types of methods used to study the interaction between steroids and tissue receptors cell fractionation autoradiography and the separation of specifically and non specifically bound steroids The next chapter deals with the metabolism of steroid hormones in relation to their binding and mechanism of action focusing on testosterone and progesterone The reader is also introduced to the intracellular binding of androgens glucocorticoids mineralocorticoids and estrogens and to how binding is related to biological activity The final chapter reviews the clinical and immunological data relevant to steroid protein binding This text will be of interest to students and practitioners of biology biochemistry and physiology *Protein Interactions* Jianfeng Cai, Rongsheng Wang, 2012-03-16 Protein interactions which include interactions between proteins and other biomolecules are essential to all aspects of biological processes such as cell growth differentiation and apoptosis Therefore investigation and modulation of protein interactions are of significance as it not only reveals the mechanism governing cellular activity but also leads to potential agents for the treatment of various diseases The objective of this book is to highlight some of the latest

approaches in the study of protein interactions including modulation of protein interactions development of analytical techniques etc Collectively they demonstrate the importance and the possibility for the further investigation and modulation of protein interactions as technology is evolving

 Research on Steroids contains the proceedings of the Fourth Meeting of the International Study Group for Steroid Hormones The papers explore the production chemical characterization and metabolism of steroid hormones and their interactions with proteins Topics range from the action of estradiol in vitro to water soluble metabolites of estrogens transport of steroids by proteins and immunological aspects of steroid hormones The binding of steroids by tissue proteins is also discussed along with the use of specific plasma proteins for the determination of steroids This volume is comprised of 38 chapters and begins with an overview of the general aspects of steroid protein interaction followed by a discussion on quantitative studies of steroid binding proteins aromatization of testosterone by human placenta enzymes relationship between plasma binding and 5 reduction of testosterone cortisol binding capacity of plasma transcortin in subjects treated with various anabolic steroids and plasma testosterone binding capacity and estrogen excretion in normal and pathological pregnancies Subsequent chapters deal with the interaction between estrogenic and carcinogenic substances in the rat mammary gland influence of steroid production on serum albumin in Cushing s syndrome and nuclear estradiol binding proteins in the uterus This book will be of interest to biochemists biologists and physiologists

STEROID-PROTEIN INTERACTIONS. ULRICH F. WESTPHAL,LOUISVILLE UNIV KY.,1962 Studies on Sprague Dawle rats have shown that the high affinity corticosteroid binding activity of serum increases after adrenalectomy or hypophysectomy This increa e becomes apparent etween the first and sec nd day after adrenalectomy goes up to approximately twice the normal binding activity and remains at this level for at least 3 weeks Injection of large doses of corticosterone into the adrenalectomized rat decreases the corticosteroid binding activity to the same low level as observed in n rmal rat after injection of the same dose of corticosterone A species specificity was demonstrated the binding protein in rat ser m was found to bind corticosterone more firmly than cortisol whereas the opposite relationship was observe for human transcortin Electrophoretic studies showed the corticosteroid binding protein in rat serum to be an alpha globulin Author
