in the fields of interpersonal communication family studies relationships family sociology and social psychology Treating People in Families William C. Nichols, 1996-01-01 The second section focuses on evaluation and treatment In depth chapters demonstrate how to apply the approach during the various stages of the family's developmental life cycle covering everything from planning therapy and defining goals to performing effective diagnosis and assessment and giving feedback to clients The book also provides a wealth of useful advice for treating problems that arise with divorce and remarriage Throughout special attention is given to ethical considerations in therapy the responsibilities of both the therapist and clients and issues of gender and ethnicity *The Psychosocial Interior of the Family* Gerald Handel, Gail G. Whitchurch, 1994 This long awaited fourth edition has the same goal as the preceding editions to understand families in terms of the kinds of interaction through which family life is constructed The changes in the family as an institution have influenced these processes just as they have influenced the ways we understand and write about them But even in these postmodern circumstances an underlying premise of the volume is that two partners establish a family because they have selected each other as distinctively meaningful to one another They will affirm modify elaborate or retreat from various aspects of the relationship through interaction over time and in changing circumstances This volume contains the best available interdisciplinary work on the social psychology of the family More than half of the selections are new to this edition which incorporates a variety of theoretical and research perspectives that provide the reader with a range of authoritative and up to date sources on the family and interpersonal relations The newer forms of family organization that have emerged in the more recent literature specifically single parent families stepfamilies and families of gay and lesbian domestic partners are included Authors have been drawn from a variety of disciplines including sociology communication family studies human development psychology anthropology and social work *Remarriage and Stepparenting* Kay Pasley, Marilyn Ihinger-Tallman, 1987-10-05 Since the mid 1970s the texture of modern society has been changed dramatically by the increasing presence of the stepfamily No longer considered the exception to the norm the stepfamily has been thrust into the mainstream by a 50% divorce rate combined with a high incidence of remarriage According to some estimates 35% of children born in the 1980s will experience stepfamily living by the time they reach the age of 18 Although interest in remarriage and stepfamily relationships is growing the literature often takes the form of popular work or anecdotal accounts with minimal data This volume provides a much needed overview of current research and theory in the field It stems from a series of meetings sponsored by the Society for Research in Child Development and funded by the Foundation for Child Development The nine scholars who participated in the year long study group along with two others prominent in the field have produced a work which explores the intricacies of remarriage and stepfamily living from a variety of perspectives How do divorce and remarriage determine parent's adjustment and parent child relationships How are the boundaries set within this new family form What are the dynamics between biological and step parents both within the newly created nuclear family and within the

linked family units those tied together for life by their common children This comprehensive volume sheds new light on these issues and more including the relatively untouched area of stepsibling relationships It incorporates findings from five recent research studies providing data not available elsewhere The contributors also examine the stepfamily within historical social and cultural contexts from changing demographics to stepfamily stereotypes They cast a critical eye on current literature in the field and on research methodologies providing insights on the changing nature of the stepfamily and developing conceptual frameworks for further research With so much important up to date scholarship under one cover REMARRIAGE AND STEPPARENTING TODAY is a valuable resource for researchers and clinicians in the areas of sociology psychology psychiatry and social work as well as for advanced students pursuing any of these disciplines **Social Work Perspectives**
