**Cities and Metropolises in France and Germany** Evelyn Gustedt, Ulrike Grabski-Kieron, Christophe Demazière, Didier Paris, 2022-11-04 In both countries France and Germany there is great pressure to change and adapt towards new forms of urbanity and to conceive new strategic approaches with limited public finance and a need for economic efficiency Not all types of urban areas are equally affected by these issues The book aims to do justice to this situation considering in both cases the context of the national urban systems As it proved impossible to address all the topics relevant to the spatial development of urban and rural areas the authors decided to concentrate on a number of important topical themes which are undoubtedly relevant in both countries albeit in different ways and which could be significant for a comparison The focus is thus on issues related to metropolises small and medium sized towns and particularly current issues of urbanity sustainability Smart Cities transport and mobility and the role of cross border urban development The structure of the chapters is conceived in these terms Besides scientific and theoretical approaches the authors also consider the practical planning perspective and methodological aspects of the topic at hand They mainly address three relevant factors the differences between the two institutional systems the development paths and historical constants and how new challenges are addressed on both sides of the border

**Small Towns in Early Modern Europe** Peter Clark, 2002-05-09 Despite the great wave of publications on European cities and towns in the pre-industrial period little has been written about the thousands of small

**British Spy Fiction and the End of Empire** Sam Goodman, 2015-06-05 The position of spy fiction is largely synonymous in popular culture with ideas of patriotism and national security with the spy himself indicative of the defence of British interests and the preservation of British power around the globe This book reveals a more complicated side to these assumptions than typically perceived arguing that the representation of space and power within spy fiction is more complex than commonly assumed Instead of the British spy tirelessly maintaining the integrity of Empire this volume illustrates how spy fiction contains disunities and disjunctions in its representation of space and the relationship between the individual and the state in an era of declining British power Focusing primarily on the work of Graham Greene Ian Fleming Len Deighton and John le Carre the volume brings a fresh methodological approach to the study of spy fiction and Cold War culture It presents close textual analysis within a framework of spatial and sovereign theory as a means of examining the cultural impact of decolonization and the shifting geopolitics of the Cold War Adopting a thematic approach to the analysis of space in spy fiction the text explores the reciprocal process by which contextual history intersects with literature throughout the period in question arguing that spy fiction is responsible for reflecting strengthening and in some cases precipitating cultural anxieties over decolonization and the end of Empire This study promises to be a welcome addition to the developing field of spy fiction criticism and popular culture studies Both engaging and original in its approach it will be important reading for students and academics engaged in the study of Cold War culture popular literature and the changing state of British identity over the course of the latter twentieth century
