movement where people are choosing to downsize the space they live in The typical American home is around 2 600 square
feet whereas the typical small or tiny house is between 100 and 400 square feet Tiny houses come in all shapes sizes and
forms but they enable simpler living in a smaller more efficient space People are joining this movement for many reasons but
the most popular reasons include environmental concerns financial concerns and the desire for more time and freedom For
most Americans 1 3 to 1 2 of their income is dedicated to the roof over their heads this translates to 15 years of working over
your lifetime just to pay for it and because of it 76% of Americans are living paycheck to paycheck So what is the alternative
One solution might be to live smaller While we don t think tiny houses are for everyone there are lessons to be learned and
applied in order to escape the cycle of debt in which almost 70% of Americans are trapped For more information click on
