Smell The Secret Seducer:

Smell P. A. Vroon, Anton van Amerongen, Hans de Vries, 1997 Explores how some cultures value the sense of smell while others see it as evidence of decadence or barbarism and others try to cleanse the air of any pungent smells at all

Revelations in Air Jude Stewart, 2021-10-26 An extraordinary strange and startlingly beautiful exploration of smell the least understood of our five senses The nose on your face is the Buckingham Palace Guard of your body the maitre d of all taste as well as the seducer of your imagination and memory and Jude Stewart has charmed them all into a wicked poetic and illuminating tour of their mysterious domains Jack Hitt author of Bunch of Amateurs Overlapping with taste yet larger in scope smell is the sense that comes closest to pure perception Smell can collapse space and time unlocking memories and transporting us to worlds both new and familiar Yet as clearly as each of us can recognize different smells the bright tang of citrus freshly sharpened pencils parched earth after rain few of us understand how and why we smell In Revelations in Air Jude Stewart takes us on a fascinating journey into the weird and wonderful world of smell Beginning with lessons on the incredible biology and history of how our noses work Stewart teaches us how to use our noses like experts Once we are properly equipped and ready to sniff Stewart explores a range of smells from lavender cut grass and hot chocolate to cannabis and old books using smell as a lens into art history science and more With an engaging colorful design and exercises for readers to refine their own skills Revelations in Air goes beyond science or history or chemistry it is a doorway into the surprising pleasurable and unfamiliar landscape of smell

The Smell of Slavery Andrew Kettler, 2020-05-28 In the Atlantic World different groups were aromatically classified in opposition to other ethnic gendered and class assemblies due to an economic necessity that needed certain bodies to be defined as excremental which culminated in the creation of a progressive tautology that linked Africa and waste through a conceptual hendiadys born of capitalist licentiousness The African subject was defined as a scented object appropriated as filthy to create levels of ownership through discourse that marked African peoples as unable to access spaces of Western modernity Embodied cultural knowledge was potent enough to alter the biological function of the five senses to create a European olfactory consciousness made to sense the African other as foul Fascinating informative and deeply researched The Smell of Slavery exposes that concerns with pungency within the Western self were emitted outward upon the freshly dug outhouse of the mass slave grave called the Atlantic World

Smelling and Tasting Alvin Silverstein, Virginia B. Silverstein, Laura Silverstein Nunn, 2002-01-01 Describes the function of smells and tastes how the brain translates and processes these messages and the research in these areas

The Transmission of Affect Teresa Brennan, 2014-02-15 The idea that one can soak up someone else's depression or anxiety or sense the tension in a room is familiar Indeed phrases that capture this notion abound in the popular vernacular negative energy dumping you could cut the tension with a knife The Transmission of Affect deals with the belief that the emotions and energies of one person or group can be absorbed by or can enter directly into another The ability to borrow or share states of

mind once historically and culturally assumed is now pathologized as Teresa Brennan shows in relation to affective transfer in psychiatric clinics and the prevalence of psychogenic illness in contemporary life To neglect the mechanism by which affect is transmitted the author claims has serious consequences for science and medical research Brennan s theory of affect is based on constant communication between individuals and their physical and social environments Her important book details the relationships among affect energy and new maladies of the soul including attention deficit disorder chronic fatigue syndrome codependency and fibromyalgia Sparks of Genius Robert Root-Bernstein, Michèle

What do you smell What do you touch Reading scripture attentively is more than a matter of sight Most of us have been taught to think about God in visual terms yet the very subject matter of scripture our relationship with the fullness of God makes irresistible demands upon all of our senses if we are to begin to understand anything about God In these meditations on stories from the New Testament Roger Ferlo shows us how to read the Bible in a full bodied way with all the senses attuned For just as a printed recipe cannot substitute for a mouth watering feast so the Bible must be brought to life through the senses Its stories must be seen heard touched smelled and tasted Only then Ferlo believes can we truly begin to encounter in our lives the Word of God to us in scripture Sensing God is one of our series of Cowley Cloister Books smaller format gift edition books designed for meditative and devotional reading The Roamers Francesco Verso, 2023-05-09 From the award winning future thinker comes a Solar Punk novel packed with near future ideas from the streets of Rome with elements of David Mitchell s Cloud Atlas and Into the Wild by Jon Krakauer The pulldogs a group of people at the twilight of Western civilisation undergo an anthropological transformation caused by the dissemination of nanites nanorobots capable of

assembling molecules to create matter This technology changes the way they eat and gives rise to a culture which while reminiscent of an ancient nomadic society is creative and new Liberation from the imperative of food combined with the ability to 3D print objects and use cloud computing makes it possible for the pulldogs to make a choice that seems impossible and anachronistic a new life but is it really an Arcadia
