

SMOKING and REPRODUCTIVE HEALTH

Chantal Stewart, MB ChB, FCOG, MRCOG, MMed (O&G), BA, RCOG/RCR Diploma in
Senior Specialist, Department of Obstetrics and Gynaecology, Groote Schuur Hosp.

*Smoking has a
significant effect on
reproductive and
child health.*

An estimated 44.5 million adults in the USA smoke cigarettes, and tobacco use is the leading preventable cause of death in that country. Cigarette smoking during pregnancy continues to be a significant public health concern. Despite decreases in the percentage of women who smoked during pregnancy in the 1990s, the Centres for Disease Control and Prevention reported that 11.4% of mothers who gave birth during 2002 smoked. A South African study reported that 39% of pregnant women smoked, with considerable variation between racial groups.

It is known that smoking in pregnancy is associated with a number of adverse outcomes, including low birth weight, abruptio placentae, miscarriage, premature delivery and an increase in

perinatal mortality. In addition, smoking affects the gametes and ovarian function, which can impair fertility, as well as having more long-lasting effects such as an earlier onset of menopause. It is also an important co-factor in the genesis of cervical cancer, one of the major health concerns in women in South Africa. This review discusses the effects of cigarette smoking on reproductive health issues.

EXPOSURE

Cigarette smoke contains over a thousand different compounds, including carbon monoxide, nicotine, polycyclic aromatic hydrocarbons (PAHs), nitroso compounds, aromatic amines, protein pyrolysates and trace elements such as cadmium and nickel. Two major mutagenic compounds are nitrosamines and PAHs. The two

programs and alcohol moderation strategies 12 Conclusion Sum This title is a short read A Short Read is a type of book that is designed to be read in one quick sitting These no fluff books are perfect for people who want an overview about a subject in a short period of time Table of Contents The Impact of Smoking and Alcohol on Fertility Smoking and Infertility Alcohol and Infertility Smoking and Male Fertility Smoking and Female Fertility Alcohol and Male Fertility Alcohol and Female Fertility Alcohol and Ovarian Function Quitting Smoking and Alcohol for Fertility Benefits of Smoking Cessation Benefits of Alcohol Moderation Seeking Support and Professional Help Smoking Cessation Programs Alcohol Moderation Strategies Conclusion Frequently Asked Questions *Health Effects of Exposure to Environmental Tobacco Smoke*, 1999 Broad review of environmental tobacco smoke Family Planning and Reproductive Health Sourcebook, 1st Ed. James Chambers, 2021-05-01 Consumer health information about family planning contraception through counseling maternal mortality mental health infertility and sexually transmitted diseases along with information about safety tips programs related to family planning assisted reproductive technology nutrition tips a glossary of related terms and list of resources for additional help **Routledge International Handbook of Women's Sexual and Reproductive Health** Jane M. Ussher, Joan C. Chrisler, Janette Perz, 2019-09-23 The Routledge International Handbook of Women's Sexual and Reproductive Health is the authoritative reference work on important leading edge developments in the domains of women's sexual and reproductive health The handbook adopts a life cycle approach to examine key milestones and events in women's sexual and reproductive health Contributors drawn from a range of disciplines including psychology medicine nursing and midwifery sociology public health women's studies and indigenous studies explore issues through three main lenses the biopsychosocial model feminist perspectives international multidisciplinary perspectives that acknowledge the intersection of identities in women's lives The handbook presents an authoritative review of the field with a focus on state of the art work encouraging future research and policy development in women's sexual and reproductive health Finally the handbook will inform health care providers about the latest research and clinical developments including women's experiences of both normal and abnormal sexual and reproductive functions Drawing upon international expertise from leading academics and clinicians in the field this is essential reading for scholars and students interested in women's reproductive health *Men's Reproductive and Sexual Health Throughout the Lifespan* Douglas T. Carrell, Alexander W. Pastuszak, James M. Hotelling, 2023-11-16 Approximately one in twenty men have sperm counts low enough to impair fertility but little progress has been made in answering fundamental questions in andrology or in developing new diagnostic tools or management strategies in infertile men Many of these problems increase with age leading to a growing population of men seeking help To address this there is a strong movement towards integrating male reproductive and sexual healthcare involving clinicians such as andrologists urologists endocrinologists and counselors This book will emphasize this integrated approach to male reproductive and sexual health throughout the lifespan Practical advice on how to perform both clinical and laboratory evaluations of infertile

men is given as well as a variety of methods for medically and surgically managing common issues This text ties together the three major pillars of clinical andrology clinical care the andrology laboratory and translational research *Analyzing Male Reproductive Risk, Understanding Molecular Targets, and Developing Treatments* Xiang Xiao,Cibele S. Borges,Huitao Li ,C. Yan Cheng,2024-07-10 Male fertility both resilient and fragile is heavily affected by external factors such as the environment drug use and eating habits in a similar way to a wall of stone that is constantly attacked and weathered to varying degrees The use of cancer drugs for instance may increase life expectancy and cure diseases but may also negatively affect male fertility A variety of factors complicate male infertility such as the intricate spermatogenesis process The available methods for diagnosis are limited not to mention treatment However some evidence showed that different reproductive physiologies may share some biological basis and thus molecular pathways such as mTOR which plays a role in testis physiology Sertoli cell function transcriptional and translational control of spermatogenesis as well as drug and environmental exposure Moreover male fertility can also reflect men s overall health and the likelihood of suffering from certain diseases suggesting that these events have common regulatory mechanisms This Research Topic aims to identify these potential shared mechanisms analyze and explore how environment disease drug use and nutritional supplements affect male fertility as well as reveal the seemingly chaotic but traceable phenomena It will be crucial for the development of diagnostics treatments and maintenance methods needed to enhance male fertility which is also the objective of this research topic This Research Topic encourages Original Research Reviews and other accepted article types including but not limited to Analyses of the possible effects of environmental pollutants brought about by industry and human activities such as endocrine disrupting chemicals EDCs on male reproduction Links between men s overall health and fertility as well as andrological effects of various illnesses including infectious diseases deficiencies hereditary diseases and physiological disorders Effects of medications and dietary supplements on male reproductive systems such as those used for cancer treatment psychiatric disorders diabetes etc The use of herbal and medicinal remedies to prevent or reverse adverse andrological effects caused by putative toxic chemicals and diseases Specific molecular mechanisms and signalling pathways that affect spermatogenesis the testis and sperm function associated with the above 4 points Shared molecular mechanisms underlying both the generation and remission of male infertility disease *Comprehensive Treatise on Anovulation: Navigating the Complex Landscape of Reproductive Health* Dr. Spineanu Eugenia,2024-10-05 *Smoking and Health in the Americas* ,1992 *Low Fertility and Reproductive Health in East Asia* Naohiro Ogawa,Iqbal H. Shah,2014-10-07 This book provides a unique blend of social and biomedical sciences in the field of low fertility and reproductive health It offers a significant contribution to understanding the determinants of low fertility mostly in East Asia including an assessment of the effectiveness of policies that aim to raise fertility It introduces new analytical tools and methods and shares application of innovative approaches to analyzing cross sectional and longitudinal survey data and macro socioeconomic data to shed light on changing mechanisms of low fertility in

the context of reproductive health The volume introduces the demographic dividend into the study of fertility analyzes possible impact of population ageing on the amount of resources allocated to child rearing i e the so called crowding effect in social care and public spending between the elderly and children The book also tests the Low Fertility Trap LFT hypothesis a new important theory regarding fertility trends The book focuses on East Asia which is numerically large but relatively under researched with regard to issues covered in various chapters The relevance of the volume however goes beyond countries in East Asia The book breaks new grounds and reveals little known facts regarding the influence of endocrine disruptors on male fertility through falling sperm counts the phenomenon of marital sexlessness and about the sexual behavior of adolescents in East Asia

Handbook of Fertility Ronald Ross Watson, 2015-04-27 Handbook of Fertility Nutrition Diet Lifestyle and Reproductive Health focuses on the ways in which food dietary supplements and toxic agents including alcohol and nicotine affect the reproductive health of both women and men Researchers in nutrition diet epidemiology and endocrinology will find this comprehensive resource invaluable in their long term goal of understanding and improving reproductive health This book brings together a broad range of experts researching the different aspects of foods and dietary supplements that promote or detract from reproductive health Section One contains several overview chapters on fertility how it is assessed and how it can be affected by different metabolic states nutritional habits dietary supplements the action of antioxidants and lifestyle choices Sections Two and Three consider how male and female fertility are affected by obesity metabolic syndrome hormonal imbalance and even bariatric surgery Section Four explores the ways diet nutrition and lifestyle support or retard the success of in vitro fertilization while Section Five explores how alcohol and other drugs of abuse lower fertility in both women and men Explores how alcohol nicotine and other drugs of abuse disrupt and impair reproductive health Reviews studies of common conditions such as obesity and metabolic syndrome and their effect on fertility and reproductive health Investigates the components of foods and dietary supplements in particular oxidative stress and antioxidants Presents the nutritional effects of foods and dietary supplements and their benefits and risks relating to reproductive health
