will permit us to live in peace as a global family even through massive climate changes Read it and put these ideas into practice as quickly as possible in any ways you can Elisabeth Sahtouris Evolutionary biologist and futurist author of *EarthDance Living Systems in Evolution* A Classroom of Teenaged Readers Driek Zirinsky, Shirley Rau, 2001 B This exciting book helps teachers turn high school students into lifelong readers by approaching reading literature as a process and encouraging teachers to center their classroom on the student instead of focussing on the literature A Classroom of Teenaged Readers explores how teenagers actually read and conveys the importance of knowing what interests teens and how they evolved as readers By understanding a teen s reading history teachers can then create student centered literature classrooms that focus on the needs and interests of their students High school English teachers **The Jaynes Legacy** Lawrence Wile, 2018-01-03 Julian Jaynes 1976 book *The Origins of Consciousness in the Breakdown of the Bicameral Mind* continues to arouse an unsettling ambivalence Richard Dawkins called it either complete rubbish or a work of consummate genius nothing in between The present book suggests that the bicameral mind is a phantasm the dating of the origin of consciousness contradicts archeological and literary evidence and the theory contributes nothing toward explaining why some physical states are conscious while others are not because the nonconscious bicameral brain is neurophysiologically equivalent to the conscious brain However the author pays tribute to Jaynes s work as a work of consummate genius because it compels us to re evaluate the significance of humankind s earliest traditions and texts that might shine light on the very suspicious totem of evolutionary mythology that consciousness has evolved continuously and gradually from worms to man The present book suggests that the evolution of the relationship between consciousnesses mass energy and spacetime radically changed nearly 6 000 years ago during the epigenetic evolutionary degeneration of a little known threadlike structure originating from the center of the central nervous system called Reissner s fiber The earliest Egyptian Hebrew Indian and Chinese traditions buried beneath the dust of fallen Babel and thousands of years of distortions and disguisings describe this process during the origin of religion and mystical traditions *Stones of the New Consciousness* Robert Simmons, 2009 *Stones of the New Consciousness* begins with a new approach to meditation with stones and to the possibility of conscious relationship with the spiritual beings who express themselves in our world as crystals and minerals This beautifully designed book examines the most important stones that help accelerate and enhance human evolution Each entry is illustrated with color photos of exceptional examples The stones include Moldavite the extraterrestrial amorphous crystal Nuummite the oldest gemstone on Earth and Circle Stones the highly energetic Flint found in crop circle formations Other featured rarities include Nirvana Quartz from the Himalayas and high vibrational Natrolite from the emerald mines of Russia Author Robert Simmons includes historical and mythological references for each stone positing that the fabled Stone of the Holy Grail and the Philosopher s Stone of the alchemists may have physical counterparts among the materials discussed Simmons presents practices for deepening one s awareness of the stones gifts from expanding one s consciousness to healing
