Taxing Democracy:

Taxing Democracy Valerie Braithwaite, 2017-03-02 The integrity of tax systems as we know them are being challenged throughout the world Tax avoidance schemes of various kinds are proving increasingly attractive and lucrative to wealthy individuals and large corporations As governments fear the erosion of their tax base among those who are most able to contribute the public is looking on as one of its most public institutions attempts to re invent itself through changing laws and administrative procedures In this book a number of experts develop the idea of responsive regulation in relation to taxation They demonstrate how law in this area is undermining social norms and social norms are undermining law A key factor in their analysis is the perception of justice Explanations as to why the integrity of tax systems is under siege and possible solutions are examined

The Economic Psychology of Tax Behaviour Erich Kirchler, 2007-06-21 Tax evasion is a complex phenomenon which is influenced not just by economic motives but by psychological factors as well Economic psychological research focuses on individual and social representations of taxation as well as decision making In this 2007 book Erich Kirchler assembles research on tax compliance with a focus on tax evasion and integrates the findings into a model based on the interaction climate between tax authorities and taxpayers The interaction climate is defined by citizens trust in authorities and the power of authorities to control taxpayers effectively depending on trust and power either voluntary compliance enforced compliance or no compliance are likely outcomes Featuring chapters on the social representations of taxation decision making and self employed income tax behaviour this book will appeal to researchers in economic psychology behavioural economics and public administration

Developing Alternative Frameworks for Explaining Tax Compliance James Alm, Jorge Martinez-Vazquez, Benno Torgler, 2010-06-10 Over the last several decades there has been a growing interest in theoretical empirical and experimental work on all aspects of tax compliance and tax evasion The essays in this volume summarize the

existing state of knowledge of tax compliance and tax evasion present new thinking about this issue and analyze the empirical relevance of these new perspectives The original essays in this volume represent an attempt to provide a framework on compliance that moves beyond the economics of crime perspective one that provides a more complete understanding of individual and group decisions and one that is more consistent with empirical evidence It is the insights of behavioural economics that provide much of the bases for these essays and the main theme running through this book is that the basic model of individual choice must be expanded by introducing some aspects of behaviour or motivation considered explicitly by other social sciences

Markets in Vice, Markets in Virtue John Braithwaite,2005 John Braithwaite argues that there are markets in vice as well as markets in virtue with the same characteristic supply and demand and demonstrates the mechanisms whereby competition induces demand for vice and more importantly the regulatory inventions that can be used to flip markets in vice to markets in virtue

Tax Fairness and Folk Justice Steven M. Sheffrin,2013-10-28 Why have Americans severely limited the estate and gift tax ostensibly targeted at only the very wealthy but greatly expanded the subsidies to low wage workers through the Earned Income Tax Credit now the single largest poverty program in the country Why do people hate the property tax so much yet seemingly revolt against it only during periods of economic change Why are some groups of taxpayers more obedient to the tax authorities than others even when they face the same enforcement regime These puzzling questions all revolve around perceptions of tax fairness Is the public simply inconsistent A sympathetic and unified explanation for these attitudes is based on understanding the everyday psychology of fairness and how it comes to be applied in taxation This book demonstrates how a serious consideration of folk justice can deepen our understanding of how tax systems actually function and how they can perhaps be reformed

Compliance Ethnography Yunmei Wu,2021-07-12 This book explores how small businesses respond to the law By detailing the intricate ways in which businesses come to comply with or violate legal regulations it shows a very different

picture of compliance that completely changes the way we think about how businesses respond to the law how we can capture such responses and what explains their behaviors The book moves us beyond a static and single perspective approach to compliance where firms are seen as obeying or breaking a specific rule at a specific point in time Instead it offers a dynamic view of compliance as it manifests in daily business where firms must comply with a host of legal rules and must do so over a long period of time This timely book is especially valuable to three main groups to compliance practitioners and regulatory enforcement agents who are increasingly forced to consider how compliance management and enforcement practices actually affect compliance to regulatory governance scholars in public administration law sociology and management science for whom compliance is a central aspect and to scholars of Chinese law who realize that compliance is a central challenge that the Chinese legal system must overcome

Measuring Compliance Melissa Rorie, Benjamin van Rooij, 2022-02-24 Compliance or the behavioral response to legal rules has become an important topic for academics and practitioners. A large body of work exists that describes different influences on business compliance but a fundamental challenge remains: how to measure compliance or noncompliance behavior itself. Without proper measurement, it's impossible to evaluate existing management and regulatory enforcement practices. *Measuring Compliance* provides the first comprehensive overview of different approaches that are or could be used to measure compliance by business organizations. The book addresses the strengths and weaknesses of various methods and offers both academics and practitioners guidance on which measures are best for different purposes. In addition to understanding the importance of measuring compliance and its potential negative effects in a variety of contexts, readers will learn how to collect data to answer different questions in the compliance domain and how to offer suggestions for improving compliance measurement.

A Fair Share of Tax Lotta Björklund Larsen, 2018-01-15 This book is open access under a CC BY 4.0 license. This book takes a taxpayer's perspective on the relations taxation creates between people and their state. Björklund Larsen proposes that in order to understand tax compliance and cheating, we have to look beyond law, psychological experiments and surveys to also include tax collectors and taxpayers' practices. The text explores the view of taxes seen as citizens' explicit economic relation to the state and implicit economic relation to all other compatriots. Björklund Larsen directs our gaze onto the concept of reciprocity, which is often proposed as an explanation in tax compliance research and explores its diverse meanings and implications ethnographically. The empirical cases are based on ethnography from two opposing tax practices in Sweden. Firstly, from a study of analysts, auditors, legal experts and managers at the Swedish Tax Agency and how they quite successfully strive for legitimacy in their tax collecting activities. Secondly, from fieldwork among a group of middle-aged Swedes and how they justify their purchasing work off the books, essentially tax cheating practices. Sweden is a modern welfare society with citizens holding rational and secular values yet trusting their government and fellow citizens. Sweden also has a high tax burden that is collected by one of its most revered governmental agencies, the Swedish Tax Agency, making it an interesting case for studying tax compliance.
