Tax Expenditures--shedding Light on Government Spending Through the Tax System Hana Polackova Bixi, Zhicheng Li Swift, Policy World Bank, 2004 *Handbook of Monetary and Fiscal Policy* Alan A. the economy and rebuilding after the fiscal crisis of the COVID 19 pandemic Stewart demonstrates the centrality of taxation for government budgets and explains key tax principles of equity efficiency and administration Presenting examples from a wide range of jurisdictions and international developments Stewart shows how tax policy and law operate in our everyday lives ranging from family and working life to taxing multinational enterprises in the global digital economy Employing an interdisciplinary approach to the history and future of taxation law and policy this is a valuable resource for legal scholars practitioners and policy makers

**Resentment** Andrea Louise Campbell, 2025-06-10 Why Americans favor progressive taxation in principle but not in practice Most Americans support progressive taxation in principle and want the rich to pay more But the specific tax policies that most favor are more regressive than progressive What is behind such a disconnect In this book Andrea Louise Campbell examines public opinion on taxation exploring why what Americans favor in principle differs from what they accept in practice Campbell shows that since the federal income tax began a century ago the rich have fought for lower taxes through reduced rates and a complicated system of tax breaks The resulting complexity leaves the public confused about who benefits from the convoluted tax code and leads to tax preferences that are driven by factors other than principles or interests Campbell argues that tax attitudes vary little by income or by party as some Democrats more Republicans and even more independents want most taxes decreased Instead white opinion on nearly every tax is racialized Many do not realize the rich benefit the most from tax breaks attitudes toward which are racialized too And among Black and Hispanic Americans long subject to government coercion greater support for government spending is not matched by greater support for taxation

Everyone has a reason to dislike taxes which helps antitax Republicans win votes and helps the rich in their long campaign to get their own taxes reduced and undermine progressivity      *Maximizing America's Prosperity* United States.
