Ager, 2022-04-27 Magic was a fundamental part of the Greco Roman world Curses erotic spells healing charms divination and other supernatural methods of trying to change the universe were everyday methods of coping with the difficulties of life in antiquity While ancient magic is most often studied through texts like surviving Greco Egyptian spellbooks and artifacts like lead curse tablets for a Greek or Roman magician a ritual was a rich sensual experience full of unusual tastes smells textures and sounds bright colors and sensations like fasting and sleeplessness Greco Roman magical rituals were particularly dominated by the sense of smell both fragrant smells and foul odors Ritual practitioners surrounded themselves with clouds of fragrant incense and perfume to create a sweet and inviting atmosphere for contact with the divine and to alter their own perceptions they also used odors as an instrumental weapon to attack enemies and command the gods Elsewhere odiferous herbs were used equally as medical cures and magical ingredients In literature scent and magic became intertwined as metaphors with fragrant spells representing the dangers of sensual perfumes and conversely smells acting as a visceral way of envisioning the mysterious action of magic The Scent of Ancient Magic explores the complex interconnection of scent and magic in the Greco Roman world between 800 BCE and CE 600 drawing on ancient literature and the modern study of the senses to examine the sensory depth and richness of ancient magic Author Britta K Ager looks at how ancient magicians used scents as part of their spells to put themselves in the right mindset for an encounter with a god

or to attack their enemies through scent Ager also examines the magicians who appear in ancient fiction like Medea and Circe and the more metaphorical ways in which their spells are confused with perfumes and herbs This book brings together recent scholarship on ancient magic from classical studies and on scent from the interdisciplinary field of sensory studies in order to examine how practicing ancient magicians used scents for ritual purposes how scent and magic were conceptually related in ancient literature and culture and how the assumption that strong scents convey powerful effects of various sorts was also found in related areas like ancient medical practices and normative religious ritual *The Smell of Sugarcane* Beverly Ann Menke, 2013-12-16 Abandoned on foreign soil in a world where language and customs are a mystery Sophia James the eldest of six Californian children is in charge and she is only eleven Told through the eyes of the sixty year old Sophia as she sits with oils painting a large canvas *The Smell of Sugarcane* is based on a true story Traveling through time with Sophia the reader witnesses the strength and power that can be found when a human spirit is determined to survive and succeed As she advances her painting a remarkable story unfolds in a place where love is hidden and dangers abound and children hold tight Rich with tropical colors the book revolves around the island of Puerto Rico Its factual and descriptive narrative keeps the reader captive as the painting progresses The reader will skip a heartbeat in moments when the children are in danger and will cry for their fears and injustices or laugh and celebrate victories *The Smell of Sugarcane* is about the importance of instilling strong principles and good values at an early age Without these the children would have been lost This book is about picking up the torch of life and holding it high while running with all one's might Ultimately it is about good profoundly triumphing over evil **Growing a Life** Illéne Pevec, 2016-09-27 *Growing a Life* demonstrates just how influential school and community gardening programs can be for adolescents Readers follow author Illéne Pevec as she travels from rural Colorado to inner New York City and from agrarian New Mexico to urban Oakland California to study remarkable youth gardening programs for at risk teens Expressive candid interviews with more than eighty students substantiated by relevant neuroscience research and a framework of positive psychology explain the life altering physical and emotional benefits of gardening As students share their experiences tending the soil and the plants feeding their families and their communities and guiding younger children readers are given the opportunity to examine the largely unexplored topic of mentored urban gardening *Growing a Life* will inspire educators community leaders and youth to team up and establish community gardens where they do not already exist and to involve youth in existing gardens *Smells, Odors, and Scents from Head to Toe* Ronald Alan Duski, 2000-06-08 This book reveals the many step by step ways to not only eliminate or lessen the smelly odors that are so embarrassing to yourself and others but it also shows how to add a pleasant smell or scent after the bad odor has been stopped or made less All the chapters in this book cover different problems of different smelly odors in the mouth armpits genitals feet and skin and just how to lessen or completely remove them The chapters also show the reader how to add pleasant smells or scents to the person who no longer has such an intense problem This book is a book

Smell Matthew Cobb, 2020-05-28 Our sense of smell or olfaction as it is technically known is our most enigmatic sense It can conjure up memories taking us back to very specific places and emotions whilst powerful smells can induce strong feelings of hunger or nausea In the animal kingdom smell can be used to find food a mate or a home to sense danger and to send and receive complex messages with other members of a species Yet despite its fundamental importance in our mental life and in the existence of all animals our scientific understanding of how smell works is limited In this Very Short Introduction Matthew Cobb describes the latest scientific research on smell in humans and other mammals in insects and even in fish He looks at how smell evolved how animals use it to navigate and communicate and disorders of smell in humans Understanding smell especially its neurobiology has proved a big challenge but olfactory science has revealed genetic factors that determine what we can and cannot smell and why some people like a given smell while others find it unbearable He ends by considering future treatments for smell disorders and speculating on the role of smell in a world of robots ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

He has since moved back to Canada He has published eleven books to date this one being his twelfth **My Life Is Art** Emmanuel Jal,2024-12-10 Drawing on lessons from his remarkable life former child soldier turned activist author entrepreneur and international recording artist Emmanuel Jal provides his eleven pillars for overcoming adversity and living a life of purpose Who owns your mind Beginning with this provocative question Emmanuel Jal invites readers to claim ownership over the narratives that define their lives in order to become a force for good in the world As a child growing up in South Sudan Jal witnessed atrocities perpetrated against his family and community These actions drove him to become a child soldier in a vicious civil war Hunger isolation and the ever present specter of death in battle attended his every moment Yet his greatest challenge did not come from outside it arose from within from the corrosive nature of hopelessness trauma and narratives of victimization Rather than succumb to these forces of negativity Jal turned his life s challenges into opportunities by utilizing a comprehensive framework he developed around eleven pillars of support These pillars can be utilized individually or as a unit to help build a durable internal structure that allows anyone to overcome adversity regain joy and gratitude and live a life of purpose that enriches the greater community *Enhancing Teaching and Learning in Higher Education in the United Arab Emirates* Cindy L. Moore,2015-08-27 The main purpose of the book is to provide insight into an area that humans often take for granted There are wonderful and exciting stories of organisms using chemical signals as a basis of a sophisticated communication system In many instances chemical signals can provide more detailed and accurate information than any other mode of communication yet this world is hidden from us because of our focus on visual and auditory signals Although we have a diversity of senses available to us humans are primarily auditory and visual animals These stimuli are sent to the more cognitive areas of our brain where they are immediately processed for information We use sounds to communicate and music to excite or soothe us Our vision provides us with communication entertainment and information about our world Even though our world is dominated by other stimulus energies we have chosen in an

evolutionary sense either auditory or visual signals to carry our most important information This is not the case for most other organisms Chemical signals mediated through the sense of smell and taste are typically more important and are used more often than other sensory signals The world of communication using chemicals is an alien world for us We are unaware of how important chemical signals are to other organisms and we often overlook the influence of chemical signals in our own life Part of this na vet about chemical signals is due to our cultural focus on visual and auditory signals but a larger part of our collective ignorance is the lack of information about chemical communication in both popular and scientific writings The popular press and popular writings virtually ignore the chemical senses especially in regard to their role or influence for humans and our human culture Academic books and textbooks are no better *A Commentary on the Psalms: Psalm CXIX. to Psalm CL. with index of Scripture references. 1874* John Mason Neale, Richard Frederick Littledale, 1874 How to Train a Police Bloodhound and Scent Discriminating Patrol Dog - 2nd Edition Kevin Kocher, Robin Kocher, 2014-04-02 This work is an in depth study of the Kocher Method of mantrailing training using intensity level exercises to build a solid foundation for your canine partner Using positive rewards and encouragement it is geared for creating a more reliable focused and driven canine partner to follow a specific human scent and quickly establishing the direction of travel A must read for all law enforcement canine handlers it is also of great interest to anyone involved with search and rescue or tracking Smell Radhika Jha, 2002
