Teach Your Own A Hopeful Path For Education:

Teach Your Own John Caldwell Holt, 1981 Om at undervise b rn hjemme *Teach Your Own* John Holt, 1982 **Teach Your Own** John Holt, Pat Farenga, 2021-09-28 The classic guide to teaching children at home for a new generation of homeschooling parents In 2019 there were more than two million children being homeschooled That number doubled during the pandemic and is now likely to continue increasing as more parents worry that school might not be the best place for their children to learn and grow *Teach Your Own* helped launch the homeschooling movement now its timeless and revolutionary message of recognizing the ways children come to understand the world has been updated for today s environment Parents and caregivers will discover how to navigate Learning in a classroom versus learning in the world The difference between a learning difficulty which we all experience every time we try to learn anything and a learning disability Schedules that achieve the homeschooling work life balance that you want as a family The relationship between learning and play Homeschooling and technology And much more John Holt s warm understanding of children and his passionate belief in every child s ability to learn have made this book an essential resource for over forty years to homeschooling families The Complete Home Learning Sourcebook Rebecca Rupp, 1998 Lists all the resources needed to create a balanced curriculum for homeschooling from preschool to high school level *Society and the Official World* John A. Denton, 1990 To find more information about Rowman and Littlefield titles please visit www.rowmanlittlefield.com *Home Schooling* Jane Van Galen, Mary Anne Pitman, 1991-01-01 This significant volume studies the growing body of research on home education and offers a broad analysis of this movement Introductory chapters present the most current information on the demographics of the movement and on the social and academic outcomes of home education Beyond these data the broader implications of the movement are considered in chapters discussing legal issues and policy analysis Additional chapters provide historical and sociological analysis of the conflicts between parents and schools that often precipitate the decision to home school The volume ends with an anthropological analysis of learning in the informal home setting and a philosophical critique of the movement as an abandonment of a belief in the efficacy of common schooling *Free Schools, Free People* Ron Miller, 2002-07-17 The first historical account of the free school movement of the 1960s **Intrinsic Motivation and Self-Determination in Human Behavior** Edward L. Deci, Richard M. Ryan, 2013-06-29 Early in this century most empirically oriented psychologists believed that all motivation was based in the physiology of a set of non nervous system tissue needs The theories of that era reflected this belief and used it in an attempt to explain an increasing number of phenomena It was not until the 1950s that it became irrefutably clear that much of human motivation is based not in these drives but rather in a set of innate psychological needs Their physiological basis is less understood and as concepts these needs lend themselves more easily to psycho logical than to physiological theorizing The convergence of evidence from a variety of scholarly efforts suggests that there are three such needs self determination competence and interpersonal

relatedness This book is primarily about self determination and competence with particular emphasis on the former and about the processes and structures that relate to these needs The need for interpersonal relatedness while no less important remains to be explored and the findings from those explorations will need to be integrated with the present theory to develop a broad organismic theory of human motivation Thus far we have articulated self determination theory which is offered as a working theory a theory in the making To stimulate the research that will allow it to evolve further we have stated self determination theory in the form of minitheories that relate to more circumscribed domains and we have developed paradigms for testing predictions from the various minitheories Social Purpose and Schooling Jerry Paquette, 2017-05-08 First published in 1991 this work critically analyses the competing claims about alternative arrangements for schooling It does so in light of major popularly understood agendas for social and political purpose and of the troubled and much less clearly understood assumptions and issues behind them The book examines closely four generic types of arrangements for schooling in light of a comprehensive framework for understanding the publicness or privateness of schools and the relationships between social and educational purpose The book poses key questions about the meaning and purpose of schooling in the rapidly evolving social demographic and technological realities of the time It also probes fundamental assumptions values and beliefs behind educational and public policy making In doing so it offers a way to make sense of unorthodox arrangements for the provision and funding of schools Homeschool M. Gaither, 2016-04-30 This is a lively account of one of the most important and overlooked themes in American education Beginning in the colonial period and working to the present Gaither describes in rich detail how the home has been used as the base for education of all kinds The last five chapters focus especially on the modern homeschooling movement and offer the most comprehensive and authoritative account of it ever written Readers will learn how and why homeschooling emerged when it did where it has been and where it may be going Please visit Gaither's blog here <http://gaither.wordpress.com/homeschool-an-american-history>

John Dewey's Great Debates - Reconstructed Shane Ralston, 2011-11-01 Confirming his moniker as America's philosopher of democracy John Dewey engaged in a series of public debates over the course of his lifetime vividly demonstrating how his thought translates into action These debates made Dewey a household name and a renowned public intellectual during the early to mid twentieth century a time when the United States fought two World Wars struggled through an economic depression experienced explosive economic growth and spawned a grassroots movement that characterized an entire era Progressivism Unfortunately much recent Dewey scholarship neglects to situate Dewey's ideas in the broader context of his activities and engagements as a public intellectual This project charts a path through two of Dewey's actual debates with his contemporaries Leon Trotsky and Robert Hutchins to two reconstructed debates with contemporary intellectuals E D Hirsch and Robert Talisse both of whom criticized Dewey's ideas long after the American philosopher's death and finally to two recent debates one on home schooling and the other on U S foreign policy in which Dewey's ideas

offer a unique and compelling vision of a way forward

The Paleoconservatives Joseph A. Scotchie, 2017-07-05 Paleoconservatism as a concept came into circulation during the 1980s as a rejoinder to the rise of neoconservatism It signifies a brand of conservatism that rose up in opposition to the New Deal setting itself against the centralizing trends that define modern politics to champion the republican virtues of self governance and celebrate the nation s varied and colorful regional cultures This volume brings together key writings of the major representatives of Old Right thought past and present The essays included here define a coherent intellectual tradition linking New York libertarians to unreconstructed Southern traditionalists to Midwestern agrarians Part I is devoted to the founding fathers of the modern conservative movement Essays by Frank Chodorov Murray Rothbard and James Burnham attack economic aspects of the New Deal big government in general and high taxes Russell Kirk introduces the cultural paleoconservatism with its preference for social classes and distinctions of age and sex while Richard Weaver explains why culture is more important to a civilization s survival than mere material conditions The second part covers the contemporary resurgence of the Old Right Chilton Williamson Jr sets out the argument against large scale immigration on cultural and economic grounds The divisive issue of trade is covered William Hawkins outlines a mercantilist trade policy at odds with the free trade libertarianism of Chodorov and Rothbard On education Allan Carlson goes further than the Beltway Right in his advocacy of home schooling M E Bradford shows how the doctrine of equality of opportunity inevitably leads to greater and more tyrannical state action The contemporary culture wars are the focus of Thomas Fleming Paul Gottfried Clyde Wilson and Samuel Francis who search for the roots of American nationalism the lessons to be drawn from the past and how they may be applied in the future

Family Ties Gary Wyatt, 2008 Relying on a decade long participant observation study this book focuses on the salience of parent child relationships for home schooling Those experiences with traditional schools emerge as a major motive for home schooling The quality of the relationships that develop between parents and children are the major predictor of a successful home schooling experience Comparing the socialization between traditional schooling and home schools Family Ties Relationships Socialization and Home Schooling investigates significant controversies in these two separate environments Professor Gary Wyatt is able to represent a parent with both experiences and contends to dispel the

typical home schooling critiques The efforts of home schooling parents to negotiate favorable identities with others and the techniques used to manage the anxiety associated with this unconventional lifestyle are explored Social Purpose and Schooling Jerald E. Paquette,1991 Critically analyzes claims made about alternative arrangements for education in the light of the major popularly understood social and political agendas and of the much less understood and articulated assumptions and issues that underlie those agendas Paper edition unseen 21 Annotation copyrighted by Book News Inc Portland OR

consumerism and careerism in order to reclaim home and family These natural mothers favor parenting practices that set them apart from the mainstream home birth extended breast feeding home schooling and natural health care Regarding themselves as part of a movement natural mothers believe they are changing society one child one family at a time Author Chris Bobel profiles some thirty natural mothers probing into their choices and asking whether they are reforming or conforming to women s traditional role Bobel s subjects say that they have chosen to follow their nature rather than social imperatives Embracing such lifestyle alternatives as voluntary simplicity and attachment parenting they place family above status and personal achievement Bobel illuminates the paradoxes of natural mothering the ways in which these women resist the trappings of upward mobility but acquiesce to a kind of biological determinism and conventional gender scripts

Substance Abuse as Symptom Louis S. Berger, 2013-05-13 What can psychoanalysis contribute to an understanding of the etiology treatment and prevention of substance abuse Here Louis Berger contests both the orthodox view of substance abuse as a disease explicable within the medical model and the fashionable dissenting view that substance abuse is a habit controllable through the willpower fostered by superficial treatment approaches According to Berger substance abuse is first and foremost a symptom He argues that it is only by grasping this fact that we can understand why standard approaches to treatment and prevention have failed Berger invokes a wide spectrum of recent analytic insights about infant and child development the psychology of narcissism and primitive character disorders in making the case that substance abuse masks serious preoedipal or midrange psychopathology Such psychopathology operating at both cultural and person levels explains why certain individuals become dependent on illicit drugs it is equally revelatory of why the substance abuse establishment and society at large continues to misconstrue the nature of the problem and to proffer ill conceived and ineffective remedies After thoroughly examining the motives conscious and unconscious that maintain mainstream myths about substance abuse Berger points the way to alternative approaches to prevention and treatment
