Zehler,2008-03-03 This book systematically examines how learning to read occurs in diverse languages and in so doing explores how literacy is learned in a second language by learners who have achieved at least basic reading skills in their first language As a consequence of rapid globalization such learners are a large and growing segment of the school population worldwide and an increasing number of schools are challenged by learners from a wide variety of languages and with distinct prior literacy experiences To succeed academically these learners must develop second language literacy skills yet little is known about the ways in which they learn to read in their first languages and even less about how the specific nature and level of their first language literacy affects second language reading development This volume provides detailed descriptions of five typologically diverse languages and their writing systems and offers comparisons of learning to read experiences in these languages Specifically it addresses the requisite competencies in learning to read in each of the languages how language and writing system properties affect the way children learn to read and the extent and ways in which literacy learning experience in one language can play a role in subsequent reading development in another Both common and distinct aspects of literacy learning experiences across languages are identified thus establishing a basis for determining which skills are available for transfer in second language reading development Learning to Read Across Languages is intended for researchers and advanced students in the areas of second language learning psycholinguistics literacy bilingualism and cross linguistic issues

Hatano, 1999-05-27 For many years the development of theories about the way children learn to read and write was dominated by studies of English speaking populations As we have learned more about the way that children learn to read and write other scripts whether they have less regularity in their grapheme phoneme correspondences or do not make use of alphabetic symbols at all it has become clear that many of the difficulties that confront children learning to read and write English specifically are less evident or even non existent in other populations At the same time some aspects of learning to read and write are very similar across scripts The unique cross linguistic perspective offered in this book including chapters on Japanese Greek and the Scandinavian languages as well as English shows how the processes of learning to read and spell are affected by the characteristics of the writing system that children are learning to master     **Learn to Read Modern**
