**How To Get Any Job You Want** Shane Cuthbert, It would be nice to think that job positions are based on merit But deep down I think we all know that this is not entirely true The job market is not fair even though especially in the public service put a lot of effort into pretending that it is Its competitive Its just that the rules of the competition are more obvious to some than they are to others The only difference between the people who have worked their way up further than you is that they know the rules better than you do That s what gives them the upper hand but its about to be what gives you the upper hand instead They may know the right people as well mind you But the main benefit they get by knowing the right people is when those right people share the right insider knowledge that others are not privy to And

when they have the right knowledge they know the right things to say especially during an interview Most importantly when you know things that others don't you think differently And it's the way that more successful people think that leads them to opportunities that others miss out on This in turn makes them more confident which in turn makes them more appealing to employers especially when it comes to the more competitive jobs In my own companies I've had to employ a lot of people I have reviewed hundreds of job applications and have trained my own HR staff how to look for the hidden red or green predictor flags that indicate how someone thinks which we can use to predict how they will act The red flags mean that no matter what the person's experience we should steer clear of them The green flags mean we should chase after them and compete for them to snatch them up before another employer gets to them first Even if it's in a different industry that other employer becomes our competitor They may not be competing for our customers but they're competing for human talent And the talents that employers crave the most tends to be rare So when we see them we pounce As you read this book you'll learn a few simple tricks and unspoken rules that will make you a green flag candidate in any job you go for This means that employers will be chasing you rather than you chasing them

*My Teacher Is Gay* Peter Van Maaren, 2011 This popular book has only been available in Dutch until now The English translation is hotly anticipated How does a teacher especially a gay teacher respond to the gradual increase in ethnic minorities in the student body *My Teacher is Gay* tells the story of Peter van Maaren who recounts his experiences at a community college in Amsterdam as the school undergoes significant changes His upbeat and sometimes disconcerting stories involve not only his interactions with students but also his fellow faculty members and school administration As it turned out thanks to his openness and sense of humor his sexual orientation was not an issue for most of the students and their parents It was often much more difficult to convince his colleagues and the administrators that a gay teacher does not automatically pose a threat to the school His goal was to show that cultivating mutual understanding respect and tolerance can actually make a positive contribution to the learning atmosphere By being open and honest about his identity he achieved far more with his students than he did when the school administration ordered him to keep quiet about his orientation and try to ignore any remarks about it The Gay Krant editorial staff in Best has received a growing number of complaints about

intolerance in education Students today are afraid to be open about their feelings and teachers report being forced back in the closet In response to this alarming trend we publish interviews in the paper Many are anonymous because the subjects are so afraid to go public Consequently I am thrilled that Peter van Maaren is the first to come forward to share his story A highly worth reading and at times moving account Now we can only hope that politicians policymakers and other involved parties will learn something from it Henk Krol Gay Krant editor in chief Education is not a matter of filling a vessel Education is certainly not a budgeting exercise for administrators Education is about lighting a fire of wisdom and humanity Let this book by Peter van Maaren offer inspiration to do just that Jan Marijnissen floor leader of the Dutch Socialist Party Peter van Maaren educator and author of the book *My Teacher is Gay* won the Humanistisch Verbond s Dutch Humanist and Ethical Union special Get Involved Bemoei je d r mee award for the dialogue about homosexuality religion personal philosophy and ethics Winner of special Get Involved Award The book *My Teacher is Gay* is not only fun to read but also extremely surprising and draws attention to the fact that in many cases the problem is not so much the ethnic minority students as it is the native born faculty and administrators according to the Get Involved award jury s report Author Peter van Maaren s attempt to reassess opinions about Muslim youth through his book was one reason why he earned first prize The Dutch Humanist and Ethical Union established the special Get Involved award for the sake of helping turn the tide with respect to waning tolerance for homosexuality The award is normally given once every two years to individuals and institutions that make a contribution towards a society in which there is greater understanding for one another Winner of special Get Involved Award In a hostile environment a gay teacher needs backing from his colleagues and the school board A compelling story from a teacher who got support from the cultural and religious divers students and their parents but not from the management Boris Dittrich Acting Director LGBT rights program Human Rights Watch **Get That Teaching Job!** Paul K.
