**Teachers, Professionalism and Class** J T Ozga, M A Lawn, 2017-05-08 First published in 1981 this book examines the concept of professionalism in the context of the development of organized teachers The argument is presented that the concept of professionalism is a complex one and its different meanings must be located within a historical context Thus its use as an ideological weapon aimed at controlling teachers must be appreciated whilst at the same time it should be understood as a weapon of self defence for teachers in their struggle against dilution

**A Companion to Research in Teacher Education** Michael A. Peters, Bronwen Cowie, Ian Menter, 2017-05-31 This state of the art Companion assembles and assesses the extant research available on teacher education and provides clear guidelines on future directions It addresses an important need in a collection that will be of value for teachers teacher educators policymakers and politicians There has been little sustained long term or systematic research to provide empirical support for the broad aspects of teacher education policy largely because such research has been chronically underfunded and based on traditional practitioner knowledge Many of the changes to teacher education are contentious and yet are occurring in rapid succession These policies and movements have important consequences for education teacher quality and the future of the teaching profession At the same time the policies and initiatives that support these changes seem to be based more on ideology business interests and tradition than on research and empirical findings The nature quality and effectiveness of teacher preparation have increasingly become a central focus for education policy worldwide in a fiercely argued debate among

governments think tanks world policy agencies education researchers and teacher organisations      **Educators, Professionalism and Politics** Terri Seddon, John Levin, 2013 This title brings together contributions from around the world that analyse and reflect on the way curriculum is configuring and reconfiguring that world      **Handbook of Teacher Education** Tony Townsend, Richard Bates, 2006-08-09 This book has its origins in conversations that started when the International Council on Education for Teaching ICET and the Australian Teacher Education Association ATEA jointly agreed to co sponsor a World Assembly of Teacher Educators in Melbourne in July 2003 hosted by Monash University The editors of this book were not only intimately involved in the management of the conference but had also been key figures in the Associations involved Tony Townsend had been secretary and on the national board of the South Pacific Association for Teacher Education SPATE which later became ATEA and had previously managed a SPATE conference in Frankston Australia in the 1980s He is currently the President of ICET and now works at Florida Atlantic University Richard Bates has been a long time board member of ATEA and is currently President of that organization He is also a Board member of ICET The International Council on Education for Teaching ICET was founded in 1953 for the purpose of emphasizing international cooperation in educational development in order to improve the quality of teacher education as well as to expand global educational opportunities for people in teacher education Since that time ICET has developed into an international association of practitioners of teacher education policy and decision makers in education government and business dedicated to global development through education ICET is a Non Governmental Organization NGO and participates in NGO meetings and other UNESCO sponsored conferences around the world      **Teaching: Professionalisation, Development and Leadership** David Johnson, Rupert Maclean, 2008-06-04 Harry Judge It is doubly fortunate that a foreword is not an introduction Since it is mercifully brief it should not be expected to mention respectfully each of the distinguished contributions which constitute the word before which it modestly stands as herald For the same reason it cannot be expected to constrain within one overarching framework contributions which are essentially varied in subject matter and method The brief of a foreword writer might indeed be compared to that of a musician commissioned to write an overture to an opera which he had not written To write such a piece for a volume devoted to Eric Hoyle is nevertheless a privilege as well as a pleasure Partly of course because this volume celebrates a long and distinguished career devoted to the application of intelligence and less assertively theory to the improvement of practice And partly because this abbreviated overture is privileged by being placed before a set of virtuoso performances throughout which consistent and coherent themes do insistently resonate Those themes are the very same that distinguish Eric Hoyle's own work      **The Routledge Companion to the Professions and Professionalism** Mike Dent, Swetha S. Ballakrishnen, Jean-Louis Denis, Tracey Adams, 2016-07-01 The Routledge Companion to the Professions and Professionalism is a state of the art reference work which maps out the current developments and debates around the sociology of the professions and how they relate to management and organizations Supported by an

**Handbook of Research on the Education of School Leaders , Reinventing the Curriculum** Mark Priestley, Gert Biesta, 2013-06-20 Scotland s Curriculum for Excellence offers an example of a different

approach to national curriculum development It combines what are claimed to be the best features of top down and bottom up approaches to curriculum development and provides an indication of the broad qualities that school education should promote rather than a detailed description of curriculum content Advocates of the approach argue that it provides central guidance for schools and maintains national standards whilst at the same time allowing schools and teachers the flexibility to take account of local needs when designing programmes of education Reinventing the Curriculum uses Scotland's Curriculum for Excellence as a rich case study analysing the strengths and weaknesses of this approach to curriculum design and development and exploring the implications for curriculum planning and development around the world

Sociology of Education and Visiting Professor in the Science of Education University of Bari      *The Finnish Education Mystery* Hannu Simola, 2014-11-20 Finnish education has been a focus of global interest since its first PISA success in 2001. After years of superficial celebration, astonishment and educational tourism, the focus has recently shifted to what is possibly the most interesting element of this Finnish success story: that Finnish schools have been effectively applying methods that go against the flow of global education policy with no testing, no inspection, no hard evaluation, no detailed national curriculum, no accountability and no hard competition. From a historical and sociological perspective, the Finnish case is not merely a linear success story but is part of a controversial and paradoxical struggle towards Utopia, towards egalitarian schooling. Bringing together a collection of essays by Hannu Simola and his colleagues, this book analyses the key dimensions of schooling in Finland to provide a critical, analytical and uncompromising picture of the Finnish education system. Going beyond the story of success, the book reveals the complexities of educational change but also identifies opportunities and alternatives for smart political action in complex and trans-national societies. Including a selection of key chapters on Finnish education policy and governance, teacher education and classroom cultures, the book will be of interest to researchers, academics and postgraduate students in comparative education, teacher education, educational policy and educational reform.

Workers, Capital, and the State in British Columbia Rennie Warburton, David Coburn, 2011-11-01 This collection of essays offers a comprehensive examination of the working class experience in British Columbia and contains essential background knowledge for an understanding of contemporary relations between government, labour and employees. It treats workers' relationship to the province's resource base, the economic role of the state, the structure of capitalism, the labour market and the influence of ethnicity and race on class relations. Using different analytical categories and based on primary research, the individual studies provide new assessments of the development of capitalist relations of production, the way new economic developments changed old and traditional cultures, the connection between the demand for labour and the immigration policy, the impact of technology on work relations and the various responses of labour to the policies of the state and capital groupings. Articles focusing on episodes from the 1870s to the present deal with major staple industries such as the early fur trade, fishing, mining and forestry, and with the struggle of labourers against their employers in communities such as New Westminster and Fraser Mills, and in specific sectors such as telecommunications and education. Many of the analyses show that ethnicity acts both as a focus of integration and resistance against external forces in the larger society and as a point of division and antagonism internal to the working class. The activities of the working class and its relationships to other parts of society are of primary importance in explaining social and economic change in the province and in the country. *Workers, Capital and the State in British Columbia* will be of interest to students of class, labour and community relations.      *Teacher Education and the Political* Matthew Clarke, Anne Phelan, 2017-01-12 *Teacher Education and the Political* is a striking book which addresses the nature and purpose of teacher education in a global context characterised by economic and political

anxieties around declining productivity and social inclusion These anxieties are manifested in recent policy developments such as the promotion of professional standards the deregulation and marketisation of teacher education and the imposition of performance related regimes that tie teachers pay to outcomes in high stakes testing The book assesses the implications of such policies for the work of teachers as well as for teacher educators and those undertaking initial teacher training It is argued that these policy moves can be read as a depoliticising and de intellectualising of teacher education In this context they illustrate how contemporary theory can provide a language for critiquing recent developments and imagining new trajectories for policy and practice in teacher education Drawing on the work of theorists from Derrida and Mouffe to Agamben and Lacan this book argues for the need to maintain a space for intellectual autonomy as a critical dimension of the ethico political work of teachers Together these ideas and analyses provide examples of the power of negative thinking illustrating its capacity to unsettle comfortable truths and foreground the political nature of teacher education Current teachers teacher educators and school leaders will be particularly interested readers alongside those concerned with policy in the wider educational landscape

**Teacher Unions in Public Education** N. Bascia, 2016-04-29 While much mainstream educational research maintains that teacher unions should be outlawed or their powers greatly reduced Bascia and her contributors including many of the leading teacher union researchers working today challenge this position Instead they recognize the important role teacher unions must play in defending public education and in minimizing the damage wrought by ill thought out educational policies By avoiding idealization of these organizations and recognizing their limitations *Teacher Unions in Public Education* demonstrates the necessity for union renewal for a successful education system
