 Book of Mormon has been an object of interest and conjecture ever since it was published in 1830 Many serious and well
 researched studies have been conducted for locations from South America to Central America to North America and beyond
 Substantive theories have been generated and extensive academic treatises and books have been written and websites
 created to promote a wide range of models attempting to address the sites and locations of where the events took place Each
 model has its proponents and its detractors and each has credible scriptural scientific and archaeological evidence to support
 elements of each model The North America Model for the Book of Mormon From Jerusalem to Cumorah locates events not
 just generally but with specificity in many cases It is based on the contemporarily written word the preferred source for
 historical research Since the Book of Mormon is true what better source would there be It is time to unravel the geography of
 the Book of Mormon from Jerusalem to Cumorah that has been hidden in plain sight since 1830 The North America Model
 indicates how close the historical and geographical footprint of the wars contentions and travels of the Nephites and
 Lamanites may have facilitated the actual founding and preservation of the United States of America in the prophesied land
 of promise through the paths and trails that the ancient peoples who inhabited the land created and which were used not

only by the colonists during the Revolutionary War but also in the course of the Civil War The legacy of the Book of Mormon is more intimately intertwined with the United States of America the promised land of liberty than originally thought
