## The Old Is Better:

**The Shock Of The Old** David Edgerton, 2011-05-26 It is rare for a book to make you see the world differently but this does exactly that on almost every page. Guardian Standard histories of technology give tired accounts of the usual inventions, inventors and dates, framing technology as the inevitable march of progress. They split history into ages: electrification, motorisation and computerisation, and rarely ask whether anyone bothered to use these inventions at the time. **Shock of the Old** is not one of those histories. Letters exist alongside emails and outlasted telegrams; we still make physical books and magazines despite the rise of the Internet; a belated rise considering that the technologies that made it possible were invented in 1965 and bookshops thrive despite Amazon. More horses were used in the Second World War than any other war in history and propeller planes continue to take off from the same runways as jets. **Shock of the Old** forces us to reassess the significance of old inventions such as corrugated iron and sewing machines and rethink the relative importance we place on the invention of something new, its application and its widespread adoption. It challenges the idea that we live in an era of ever-increasing change and interweaving political, economic and cultural history teaches us to think critically about technology.

interventional cardiology, this comprehensive clinical reference on carotid artery stenting provides illustrated step-by-step descriptions of techniques and details on indications, contraindications, patient selection, complications, technology and clinical trials. The first section reviews clinical results and experience including the CAVATAS trial findings on stroke prevention. The second section describes stenting techniques and includes information from major trials on design and application of devices. The third section presents guidelines and current regulations on establishing a carotid stenting program. The book concludes with a preview of future directions.
