The Organizational Role Of Supervisors:

The Organizational Role of Supervisors Jack Asgar, 1989 *Supervision - the Organizational Role of Supervisors* Jack Asgar, 2008-06 The purpose of this book is twofold 1 to delineate the unique functions of the firstline supervisors and to guide them in how they can function effectively in the real world and 2 to inform managers on what performance they should expect from their subordinate supervisors and to guide them in achieving productive results from their workgroup The role of a supervisor as differentiated from that of a manager often is very hazy in a multilevel organization In some cases every level of management gets involved in supervision and duplicates the supervision function Often these misuses of functions are justified on the basis of Management by Walking Around Show of Interest and Concern with the Worker etc These management fads and euphemisms not only produce negative results they will cause other deep rooted problems for the organization First by managers doing the job of supervisors managers do not have the time to perform their own managerial duties which are essential and distinctly different Second when an organization recognizes that managerial activities are not being performed the organization creates additional levels of management causing the burden of unreasonable overhead costs Third the managers usurp the function of supervisors not allowing the supervisors to learn and strengthen themselves No amount of supervisory training is going to compensate for the lack of opportunity to perform Fourth at best these misuses of functions are going to create many duplications of effort Organizations have to realize that supervision is different from managing and that each level requires a different set of skills and a different set of responsibilities Various levels of the organization are not the result of outgrowth from the previous one We truly do have levels if discontinuity in organizations For example when a worker gets promoted to supervisor he or she must realize that this new position is different not only in superficial issues such as title salary benefits perks parking locations etc but also in the nature of the work Supervision requires learning and performing supervisory skills Also when supervisors become managers they have to recognize the level of discontinuity again Managers are not glorified supervisors Their function is substantially different and they too have to learn and perform these different functions One of the important realizations is to let the supervisors supervise This simple statement is the essence of success Those who do not understand or practice that simple axiom are doomed to reap the results of their own doing There is no other book available in the market that discusses these issues *The Roles of Supervisors Within the Organization* Judith Künneke, 2020 This paper investigates the role of the supervisor from a performance management and control perspective This investigation has two parts 1 who to select as supervisor and 2 does the supervisor actually have an impact on subordinate performance As many organizations have a structured supervision program in place that aims at developing employees it is important to understand the determinants of the eligibility to act as supervisor Therefore I examine which competencies influence the likelihood of receiving the responsibilities and tasks that come with the supervisory role I hypothesize that soft skills increase the employee s likelihood of becoming a supervisor as

these are necessary to effectively communicate and transfer knowledge to subordinates Next I investigate if and to what extent the expected benefits from supervision are actually realized by the subordinates The effectiveness of such supervision programs are especially important as knowledge and skills have to be passed on to the next generation of employees Hence I predict that the supervisors ability and effort is a crucial factor that positively influences the performance of their subordinates In addition I identify a measure specifically capturing supervisor counselling ability which enhance the transfer of the supervisor s general knowledge and skills Using proprietary data from an international professional service provider I find evidence confirming my predictions Changing Roles and Practices of Bus Field Supervisors Gayland K.

Moffat,Transit Cooperative Research Program,National Research Council (U.S.). Transportation Research Board,1996 Addresses the roles and responsibilities of bus field supervisors including emerging concerns about how to improve the relationship between supervisors and bus operators while placing supervisors in a more positive role how to obtain a greater return from employee productivity with tightening budgets and declining ridership and how to improve customer service
