**The Other Mirror** Miguel Angel Centeno, Fernando López-Alves, 2001 If social science's cultural turn has taught us anything it is that knowledge is constrained by the time and place in which it is produced In response scholars have begun to reassess social theory from the standpoints of groups and places outside of the European context upon which most grand theory is based Here a distinguished group of scholars reevaluates widely accepted theories of state property race and economics against Latin American experiences with a two fold purpose They seek to deepen our understanding of Latin America and the problems it faces And by testing social science paradigms against a broader variety of cases they pursue a better and truly generalizable map of the social world Bringing universal theory into dialogue with specific history the contributors consider what forms Latin American variations of classical themes might take and which theories are most useful in describing Latin America For example the Argentinian experience reveals the limitations of neoclassical descriptions of economic development but Charles Tilly's emphasis on the importance of war and collective action to statemaking holds up well when thoughtfully adapted to Latin American situations Marxist structural analysis is problematic in a region where political divisions do not fully express class cleavages but aspects of Karl Polanyi's socioeconomic theory cross borders with relative ease This fresh theoretical discussion expands the scope of Latin American studies and social theory bringing the two into an unprecedented conversation that will benefit both Contributors are in addition to the editors Jeremy Adelman Jorge I Domínguez Paul Gootenberg Alan Knight Robert M Levine Claudio Lomnitz John Markoff Verónica Montecinos Steven C Topik and J Samuel Valenzuela **The Other Mirror**, 2001 *Social Sciences* Lawrence Boudon, Katherine D. Andy Knight, Julián Castro-Rea, 2016-04-01 Since the end of the Second World War the map of the Americas has changed dramatically Not only were many former European colonies turned into sovereign states there was also an ongoing process of region making recognizable throughout the hemisphere and obvious through the establishment of several regional agreements The emergence of political and economic regional integration blocs is a very timely topic analyzed by scholars in many disciplines worldwide This book looks at remapping the recent trends in region making throughout the Americas in a way that hasn't been at the center of academic analyses so far While examining these regionalisation tendencies with a historical background in mind the authors also answer fundamental questions such as What influences does globalization have on region making both on normative regionalism plans as well as on actual economic political cultural military and social regionalization processes driven by state and non state actors What ideas or interests lead states in the Americas to cooperate or compete with one another and how is this power distributed How do these regional agreements affect trade relations and have there been trade barriers set up to protect national economies What agreements exist or have existed and how did they change with regard to contents and for what reason The book informs academic as well as non academic

audiences about regional developments in the Americas in particular those dating back to the last twenty years Beyond the primary purpose of summarizing the hemisphere s recent trends the book also brings clarification in a detailed but easy to understand way about timely issues regarding the institutionalisation or lack thereof of the plethora of regional and sub regional bodies that have emerged in this hemisphere over the past couple of decades **From Windfall to Curse?**

Galligan,Mila Versteeg,2013-10-14 This volume analyses the social and political forces that influence constitutions and the process of constitution making It combines theoretical perspectives on the social and political foundations of constitutions with a range of detailed case studies from nineteen countries In the first part leading scholars analyse and develop a range of theoretical perspectives including constitutions as coordination devices mission statements contracts products of domestic power play transnational documents and as reflection of the will of the people In the second part these theories are examined through in depth case studies of the social and political foundations of constitutions in countries such as Egypt Nigeria Japan Romania Bulgaria New Zealand Israel Argentina and others The result is a multidimensional study of constitutions as social phenomena and their interaction with other social phenomena Struggles of Voice José Antonio Lucero,2008-10-31 Over the last two decades indigenous populations in Latin America have achieved a remarkable level of visibility and political effectiveness particularly in Ecuador and Bolivia In Struggles of Voice Jose Antonio Lucero examines these two outstanding examples in order to understand their

different patterns of indigenous mobilization and to reformulate the theoretical model by which we link political representation to social change Building on extensive fieldwork Lucero considers Ecuador's united indigenous movement and compares it to the more fragmented situation in Bolivia He analyzes the mechanisms at work in political and social structures to explain the different outcomes in each case Lucero assesses the intricacies of the many indigenous organizations and the influence of various NGOs to uncover how the conflicts within social movements the shifting nature of indigenous identities and the politics of transnationalism all contribute to the success or failure of political mobilization Blending philosophical inquiry with empirical analysis Struggles of Voice is an informed and incisive comparative history of indigenous movements in these two Andean countries It helps to redefine our understanding of the complex intersections of social movements and political representation

**Economists in the Americas** Veronica Montecinos, John Markoff, 2010-01-01 Probably no region's economists have had greater public visibility or greater impact on regional and national public policy than Latin America's and no region has been more directly affected by the spread of US economics Economists in the Americas joins a small but important comparative literature on economics as a profession and is the first comparative treatment of professional economists in the United States and Latin America A multidisciplinary group of scholars discusses the last sixty years of shifting trends in economics in seven countries in the Western Hemisphere Argentina Brazil Chile Colombia Mexico Uruguay and the United States The chapters address the history of economics in the Americas the role of economists in politics and policy making economics education and competing paradigms in the field This collection points to the interconnections among the national cases the forging and breakdown of consensus around state and market dominance the transnational diffusion of economic ideas and professional norms as well as the embrace and rejection of an increasingly Americanized professional identity among Latin American economists The book will be of interest to policymakers and scholars interested in the comparative history and sociology of economics development public policy international affairs political science and Latin American studies

**Europe and the Americas** Jeremy Smith, 2006-08-01 This volume takes up current debates in comparative and historical sociology that deal with multiple modernities and civilizations It does so through an examination of patterns of state formation civilization and the development of capitalism in the interaction of European and American worlds over three centuries The early part of the argument explores cutting edge theoretical debates around the nature of early modern formations

**State Formation** Christian Krohn-Hansen, Knut G. Nustad, 2005-09-20 What is the state and how can we best study it This book investigates new ways of analysing the state The contributors argue that the state is not a fixed and definite object Our perceptions of it are constantly changing and differ from person to person What is your idea of the state if you are a refugee Or if you are living in post apartheid South Africa Our perceptions are formed and sustained by evolving discourses and techniques these come from institutions such as government but are also made by communities and individuals The contributors examine how state structures are viewed from the inside by official state bodies composed of

bureaucrats and politicians and how these state manifestations are supported reproduced or transformed at a local level An outline of theoretical approaches is followed by nine case studies ranging from South Africa to Peru to Norway With a good range of contributors including Cris Shore Clifton Crais Ana Alonso and Bruce Kapferer this is a comprehensive critical analysis of anthropological approaches to the study of state formation *Pistoleros and Popular Movements* Benjamin T. Smith, 2009-01-01 The postrevolutionary reconstruction of the Mexican government did not easily or immediately reach all corners of the country At every level political intermediaries negotiated resisted appropriated or ignored the dictates of the central government National policy reverberated through Mexico's local and political networks in countless different ways and resulted in a myriad of regional arrangements It is this process of diffusion politicking and conflict that Benjamin T Smith examines in *Pistoleros and Popular Movements* Oaxaca's urban social movements and the tension between federal state and local governments illuminate the multivalent contradictions fragmentations and crises of the state building effort at the regional level A better understanding of these local transformations yields a more realistic overall view of the national project of state building Smith places Oaxaca within this larger framework of postrevolutionary Mexico by comparing the region to other states and linking local politics to state and national developments Drawing on an impressive range of regional case studies this volume is a comprehensive and engaging study of postrevolutionary Oaxaca's role in the formation of modern Mexico *Mexican Muralism* Alejandro Anreus, Leonard Folgarait, Robin Adèle Greeley, 2012-09-08 In this comprehensive collection of essays three generations of international scholars examines Mexican muralism in its broad artistic and historical contexts from its iconic figures to their successors in Mexico the United States and across Latin America *México Beyond 1968* Jaime M. Pensado, Enrique C. Ochoa, 2018-09-18 This book offers a critical look at Mexican activism that expands our understanding of social movements during the Global 1960s Provided by publisher ***Lines in the Sand*** William E. Skuban, 2007 Skuban's study highlights the fabricated nature of national identity in what became one of the most contentious border disputes in South American history ***Capitalist Outsiders*** Leslie C. Gates, 2023-04-18 Social polarization has roiled neoliberal political establishments but has rarely culminated in electoral victories for anticapitalist outsiders Instead outsiders who accommodate capitalists often prevail *Capitalist Outsiders* revisits celebrated exemplars of Latin American populism in Mexico and Venezuela to shed light on this phenomenon It reveals how anticorruption campaigns boosted Mexico's neoliberal era capitalist outsider by drowning out salacious corporate scandals how Venezuela's apparently enlightened capitalist outsiders of the 1940s relied on segregationist punitive labor relations and how corporate insiders of Venezuela's neoliberal political establishment unwittingly validated the anticapitalist Hugo Chávez as the true outsider It weaves together these case studies to reveal an unlikely common origin for capitalist outsiders in both countries their sequential insertion into global oil production and Mexico's early twentieth century radical oil workers *Capitalist Outsiders* moves beyond cataloging populist traits and tactics or devising the institutions that might avert their rise Instead it specifies

the distinct social bases of capitalist vs anticapitalist outsiders It exposes how a nation's earlier incorporation into the capitalist world economy casts a long shadow over neoliberal era outsider politics      **Citizens and Sportsmen** Brenda Elsey, 2011-07-01 F tбол or soccer as it is called in the United States is the most popular sport in the world Millions of people schedule their lives and build identities around it The World Cup tournament played every four years draws an audience of more than a billion people and provides a global platform for displays of athletic prowess nationalist rhetoric and commercial advertising F tбол is ubiquitous in Latin America yet few academic histories of the sport exist and even fewer focus on its relevance to politics in the region To fill that gap this book uses amateur f tбол clubs in Chile to understand the history of civic associations popular culture and politics In *Citizens and Sportsmen* Brenda Elsey argues that f tбол clubs integrated working class men into urban politics connected them to parties and served as venues of political critique In this way they contributed to the democratization of the public sphere Elsey shows how club members debated ideas about class ethnic and gender identities and also how their belief in the uniquely democratic nature of Chile energized state institutions even as it led members to criticize those very institutions Furthermore she reveals how f tбол clubs created rituals narratives and symbols that legitimated workers' claims to political subjectivity Her case study demonstrates that the relationship between formal and informal politics is essential to fostering civic engagement and supporting democratic practices
