Mitchell, H. Lyn Miles, 1999-08-26 Research on

the mental abilities of chimpanzees and bonobos has been widely celebrated and used in reconstructions of human evolution. In contrast, less attention has been paid to the abilities of gorillas and orangutans. This 1999 volume aims to help complete the picture of hominoid cognition by bringing together the work on gorillas and orangutans and setting it in comparative perspective. The introductory chapters set the evolutionary context for comparing cognition in gorillas and orangutans to that of chimpanzees, bonobos, and humans. The remaining chapters focus primarily on the kinds and levels of intelligence displayed by orangutans and gorillas compared to other great apes, including performances in the classic domains of tool use and tool making, imitation, self-awareness, social communication, and symbol use. All those wanting more information on the mental abilities of these sometimes neglected but important primates will find this book a treasure trove. Comparative Psychology Gary Greenberg, Maury M. Haraway, 1998. This volume traces the modern critical and performance history of this play, one of Shakespeare's most loved and most performed comedies. The essay focus on such modern concerns as feminism, deconstruction, textual theory, and queer theory. **International Journal of Language Studies (IJLS) □ volume 6(2)** Mohammad Ali Salmani Nodoushan, 2012-03-22. Eman Safadi, Johanna Enns, Kananen 39-66, Sedat Maden 67-86, Jiin Yih Yeo, Yesim. Olivia the orangutan helps the other orangutans by doing their chores while they play, but when other animals start asking for her help, she finds she may have taken on too much for one individual. **Animals and the Environment** Lisa Kemmerer, 2015-05-01. Contemporary Earth and animal activists rarely collaborate, perhaps because environmentalists focus on species and ecosystems while animal advocates look to the individual, and neither seems to have much respect for the other. This diverse collection of essays highlights common ground between earth and animal advocates, most notably the protection of wildlife and personal dietary choice. If earth and animal advocates move beyond philosophical differences and resultant divergent priorities, turning attention to shared goals, both will be more effective, and both animals and the environment will benefit. Given the undeniable seriousness of the environmental problems that we face, including climate change and species extinction, it is essential that activists join forces. Drawing on a wide range of issues and disciplines, ranging from wildlife management, hunting, and the work of NGOs to ethics, ecofeminism, religion, and animal welfare, this volume provides a stimulating collection of ideas and challenges for anyone else who cares about the environment or animals. The Neglected Ape Biruté M.F. Galdikas, R.D. Nadler, N. Rosen, Lori K. Sheeran, 2013-11-11. The orangutan is the most highly endangered species of great ape. Orangutans are threatened by deforestation, poaching, the illegal pet trade, and the isolation and fragmentation of dwindling wild populations. Their conservation is impeded by certain aspects of their ecology, e.g. a rain forest habitat and certain features of their life history, e.g. an eight to twelve year interbirth interval. Added to the U.S. Endangered Species List in 1970, the orangutan is now clearly on the road to extinction. The

number of wild orangutans in Borneo and Sumatra is currently estimated to have decreased to between 12 300 and 20 571 individuals Only 2% of original orangutan habitat is protected and some of these areas are now being destroyed Clearly attention to ecology demography censusing rehabilitation and conservation is essential if the orangutan is to survive in the wild beyond the next century The protection of orangutans is a complex multifaceted problem involving such pressing issues as human poverty overpopulation and the economic development of Southeast Asia Although the orangutan has been placed in Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora CITES more orangutans were sold illegally in Taiwan between 1990 and 1993 than are housed in all the world s zoos In the past scientific and public attention has centered on the African apes For this reason the sole Asian great ape the orangutan has been called the neglected ape

Extractive Industries and Ape Conservation Arcus Foundation, 2014-03-27 Current dominant thinking and practice in the private and public sectors asserts that peoples development needs are in conflict with or mutually exclusive to the need to conserve the biosphere on which we depend Consequently we are asked to either diminish development in the name of conservation or diminish conservation in the name of development Efforts to identify complementary objectives or mutually acceptable trade offs and compromises indicate however that this does not always have to be the case This first volume in the State of the Apes series draws attention to the evolving context within which great ape and gibbon habitats are increasingly interfacing with extractive industries Intended for a broad range of policy makers industry experts decision makers academics researchers and NGOs these publications aim
