*Celestial Music?* Wilfrid Mellers, 2002 Articles on masterpieces of European religious music from the middle ages to Stravinsky and Tavener The late Wilfrid Mellers who occupies a special place among music critics described himself as a non believer but his preference for music that displays a sense of the numinous in his words will strike a chord with many who listen to religious music nowadays and who share his view that music that confronts first and last things is likely to offer more than music that evades them The essays form five groups which together offer a survey of religious music from around the first millennium to the beginning of the second in the context of the difficult issues of what religious music is and for good measure what is religion The parts are The Ages of Christian Faith The Re birth of a Re birth From Renaissance to High Baroque From Enlightenment to Doubt From the Death of God to the Unanswered Question and The Ancient Law and the Modern Mind Musical discussion with copious examples is conducted throughout the book in a context that is also religious and indeed philosophical social and political with the open endedness that such an approach demands in the presentation of ideas about music's most fundamental nature and purposes
