**The Global Recession and China's Political Economy** D. Yang, 2012-04-14 In this volume some of the leading scholars on China s development examine China s responses to the global financial crisis and their implications for China s economy society and the international balances of power

Useful Complaints Jing Chen, 2016-09-09 This book develops an informational theory to account for the coexistence of China s exceptionally resilient authoritarianism and its high decentralization The nuanced information contained in citizens complaints which are filed through the petition system helps to sustain China s decentralized authoritarianism in three important ways First petitions help to alleviate the information asymmetry problem that arises when the central government has less information than lower level governments do When studying citizens petitions higher level governments can obtain valuable and accurate information about local officials performance in policy implementation public goods provision and corruption Higher level governments need this information in order to effectively utilize the cadre management system to reward good performance and punish malpractice The result of this interaction is the PRC s relatively high quality of governance and effective control of local officials There is also a second way in which citizens petitions help the government to overcome the dictator s dilemma that arises when an authoritarian regime is uncertain about how much support it really enjoys among its citizens Citizens specific grievances are revealed in these petitions and are mostly addressed in their beginning stages When citizens complaints are rooted in central policy they set the agenda for policy change in order to maintain social order There is yet a third benefit conferred upon the PRC by the petition system Thanks to the petition system the central government can present itself as the ally of citizens when it addresses the matters raised by their petitions

As a result the petition system grants the central government an opportunity to hold local officials accountable scapegoat local authorities divide citizens and local officials and justly claim all the credit when its policies succeed This helps to build citizens trust in their central government and reinforces its legitimacy in their eyes In Huntington's terms the Chinese Communist Party institutionalizes mass support by addressing citizens grievances expressed through the channel of communication provided by the petition system In this sense the complaints of citizens can be very useful tools for regime maintenance The author substantiates these points with case studies and statistical analysis **Responsive**

**Authoritarianism in China** Christopher Heurlin, 2016-10-27 How can protests influence policymaking in a repressive dictatorship **Responsive** **Authoritarianism in China** sheds light on this important question through case studies of land takings and demolitions two of the most explosive issues in contemporary China In the early 2000s landless farmers and evictees unleashed waves of disruptive protests Surprisingly the Chinese government responded by adopting wide ranging policy changes that addressed many of the protesters grievances Heurlin traces policy changes from local protests in the provinces to the halls of the National People's Congress NPC in Beijing In doing so he highlights the interplay between local protests state institutions and elite politics He shows that the much maligned petitioning system actually plays an important role in elevating protesters concerns to the policymaking agenda Delving deep into the policymaking process the book illustrates how the State Council and NPC have become battlegrounds for conflicts between ministries and local governments over state policies

*Charting China's Future* Jae Ho Chung, 2006-08-24 China has become an undisputed global phenomenon yet twenty five years ago its remarkable accomplishments were largely unforeseen In an ambitious effort to predict China's coming decades this book explores not only the economic development that has been a key indicator of its success but the often veiled political social and international determinants that will be crucial Leading scholars draw on their years of experience and on the ground understanding of current trends to make informed estimates of China's path positing that its future may well hold neither threat nor collapse All of the contributors provide a set of scenarios and order them in terms of likelihood including the seven factors they have identified as central to charting China's future the Communist Party local electoral reforms and rule of law the federalist possibility social unrest foreign policy orientations Sino American relations and the Taiwan conundrum This book is a must read for anyone who wants to understand China as it rises in power on the world stage Contributions by Jean Pierre Cabestan Jae Ho Chung Bruce J Dickson Peter Hays Gries Tao chiu Lam Yawei Liu Gilbert Rozman and Shiping Tang
